NEW QUESTION: 1

Users typically forget to add components when they create new issues. As a result, most of the newly created issues get assigned to Tom, who is the project lead.

Tom reviews all of the issues, and wants to triage them based on component selection. But when he edits an issue and adds a component, the assignee does not change.

Why does the assignee not change when adding a component to an issue?

- A. The default assignee of the selected components is set to Project default.
- B. The Assignee field additionally needs to be changed to Automatic.
- C. The project's default assignee overwrites the value of the component lead.
- D. Auto-assignment with components only works when creating issues.
- E. The selected components do not have a component lead set.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 2

Below you are shown an extract of a field configuration used by all issue types in your project.

Name	Required	Renderers	Screens
A detailed description	Yes	Wiki Style Renderer	 1 screen

The field 'A detailed description' is a custom field of type Text field (multi-line).

Which two statements are true? (Choose two.)

- A. The field can only be used in combination with the Description system field.
- B. The project is configured to use only a single screen.
- C. The field is mandatory in each issue type used in the project.

- D. Users will be able to format text in the field.
- E. The maximum text length is limited to 100 characters.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

The extract of a permission scheme is shown below.

Permission	Granted to
Administer Projects	Project role: Administrators
Browse Projects	Project role: Viewers
Assign Issues	Project role: Assigners
Assignable User	Project role: Assignables Project role: Editors
Edit Issues	Project role: Editors
Work On Issues	Project role: Workers

Clare is joining your team to help out as first-level support.

Her job will be:

- Analyze incoming requests
- requests to subject matter experts

Which two project roles will she need? (Choose two.)

- A. Viewers
- B. Assignables
- C. Editors
- D. Workers
- E. Assigners
- F. Administrators

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 4

Which two can project administrators associate with project roles? (Choose two.)

- A. Individual users
- B. Application access
- C. Project permissions
- D. Groups
- E. Global permissions
- F. Security levels

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

All users should be able to transition issues in your project without restrictions.

However, some users complain that they cannot transition issues to the In Progress status. They can execute other transitions.

The workflow is shown below.

What should you request from the Jira administrator?

- A. Remove existing conditions from the global In Progress transition.
- B. Add a new transition from Done to In Progress.
- C. Add a new transition from To Do to In Progress.
- D. Remove existing triggers from the global In Progress transition.
- E. Add all project users to the Transition Issues project permission.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 6

You need a way to put issues On Hold.

Additionally you need to filter for all issues that:

- were put On Hold by user Dave

- were put On Hold in the last 30 days

The current workflow is shown below:

Which combination of configuration items will meet the requirements?

- A. Status, screen
- B. Transition, post-function
- C. Transition, custom field (User Picker)
- D. Screen, custom field (Date picker)
- E. Status, transitions

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 7

You are the project administrator for a Software Scrum Project.

Time Tracking is globally enabled.

Identify the reason why users are NOT able to log work.

- A. The issues do not have an Original Estimate.
- B. The Log Work field is not present on any project screens.
- C. Time Tracking on the Scrum board is set to None.
- D. Issue estimation on the Scrum board is set to Story points instead of Original Estimate.
- E. The users do not have the Work On Issues permission.

Answer: E ([LEAVE A REPLY](#))

NEW QUESTION: 8

A project administrator wants to modify his project screen. The project screen meets all the prerequisites for him to be able to edit it.

Which two actions can he NOT perform? (Choose two.)

- A. Make a field required
- B. Rename a tab
- C. Rearrange existing fields
- D. Move a tab
- E. Remove a field
- F. Create a new field

Answer: A,F ([LEAVE A REPLY](#))

NEW QUESTION: 9

- A. add a URL and link text
- B. display project team members
- C. remove links to Reports
- D. change the background color
- E. display project descriptions

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

You want to gather metrics on how long it takes the team to resolve issues in their project. Which report should you use?

- A. Time Tracking Report
- B. Single Level Group By Report
- C. Average Age Report
- D. Time Since Issues Report
- E. Resolution Time Report

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

Max and Emma both have Jira Software application access, and they are members of the same groups and project roles in the DEV project.

However, Max can rank issues on the project's Kanban board, while Emma cannot.

Which configuration will definitely explain the observed behavior?

- A. Max and Emma have different global permissions.
- B. Max and Emma are associated with different security levels.
- C. Only Max has a valid Jira Software license.
- D. Only Max is a project administrator of the DEV project.
- E. Max is a component lead and Emma is a project lead in the DEV project.
- F. Only Max has been granted the Schedule Issues permission in the DEV project.

Answer: F ([LEAVE A REPLY](#))

NEW QUESTION: 12

A user approaches you with a problem. She cannot see or edit the Priority system field on any of the screens of a Process Management project.

What explains the problem?

- A. She does not have the correct permission.
- B. The field is hidden in the field configuration.
- C. She is not listed in the priority scheme.
- D. The field does not have the correct configuration context.
- E. The field is not available for this project template.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

Tom needs to work on scheduling and reordering future Sprints in a project.

What are the minimum two permissions that Tom needs? (Choose two.)

- A. Administer Projects
- B. Browse Projects
- C. Schedule Issues

- D. Manage Sprints
- E. Work On Issues
- F. View Development Tools

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 14

You need a field which meets the following requirements:

- It indicates the importance of an issue.
- It must be used in all projects.
- It must allow only a single value.
- It must have a default.
- It must have different options in different projects.
- It must allow options to be disabled.

Which field meets these requirements?

- A. Select List (single choice) custom field
- B. Component/s system field
- C. Checkboxes custom field
- D. Labels system field

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

A Jira project uses a single issue type.

Alana complains that she is not able to see the custom field Approval Board when she views a specific issue. She can see the field on other issues in the project. You check the screen configuration and confirm that the field is on the correct screen.

Why does Alana NOT see the field on that specific issue?

- A. The field is hidden by the workflow status.
- B. The field is hidden in the field configuration.
- C. The field is hidden by a security level.
- D. The field was disabled by a Jira administrator.
- E. The field has no value at the moment.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16
