NEW QUESTION: 1

What is one feature of the IBM API Connect capability?

- A. Provides a robust set of enterprise-grade API management capabilities
- B. Access, transform, and combine data assets across all of your enterprise applications, databases, and systems, with the capability to expose them as APIs
- C. Build integration flows with pre-built connectors for SaaS products and APIs
- D. Provides security, control, integration, and optimized access to APIs

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

An organization is looking into enabling multiple instances of Cloud Pak for Integration - Operations Dashboard in a single Cloud Pak for Integration cluster. What statement below is true?

- A. The namespace/project must be partitioned before enabling additional instances
- B. Only one instance can be enabled per cluster
- C. Only one instance can be enabled per namespace/project
- D. Multiple instances can be enabled on the same namespace/project

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 3

Which situation would lead to loss of an etcd quorum in an OpenShift v4 cluster?

- A. The majority of master/control plane hosts are lost
- B. The database used by all Cloud Pak for Integration components is corrupted
- C. One of the master nodes has gone off line

D. OpenShift has lost all worker nodes

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 4

What is one way to perform an automated build of an App Connect Enterprise (ACE) application within a CI/CD pipeline?

A. Use Source2Image within a Tekton pipeline to create a bar file from a Project Interchange.

B. Run a Docker build to create a bar file within a Jenkins pipeline, and store it in Artifactory.

C. Use Jenkins to spin up an ACE container, build a bar file, and destroy the container.

D. Build a bar file from a Project Interchange within the ACE toolkit and push it to GitHub.

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 5

The API Integration pattern is used to enable which use case?

A. Synchronous point-to-point access to services in closed heritage systems or heterogeneous backends

B. Asynchronous many-to-many coordination of services across multicloud and on-premises contexts

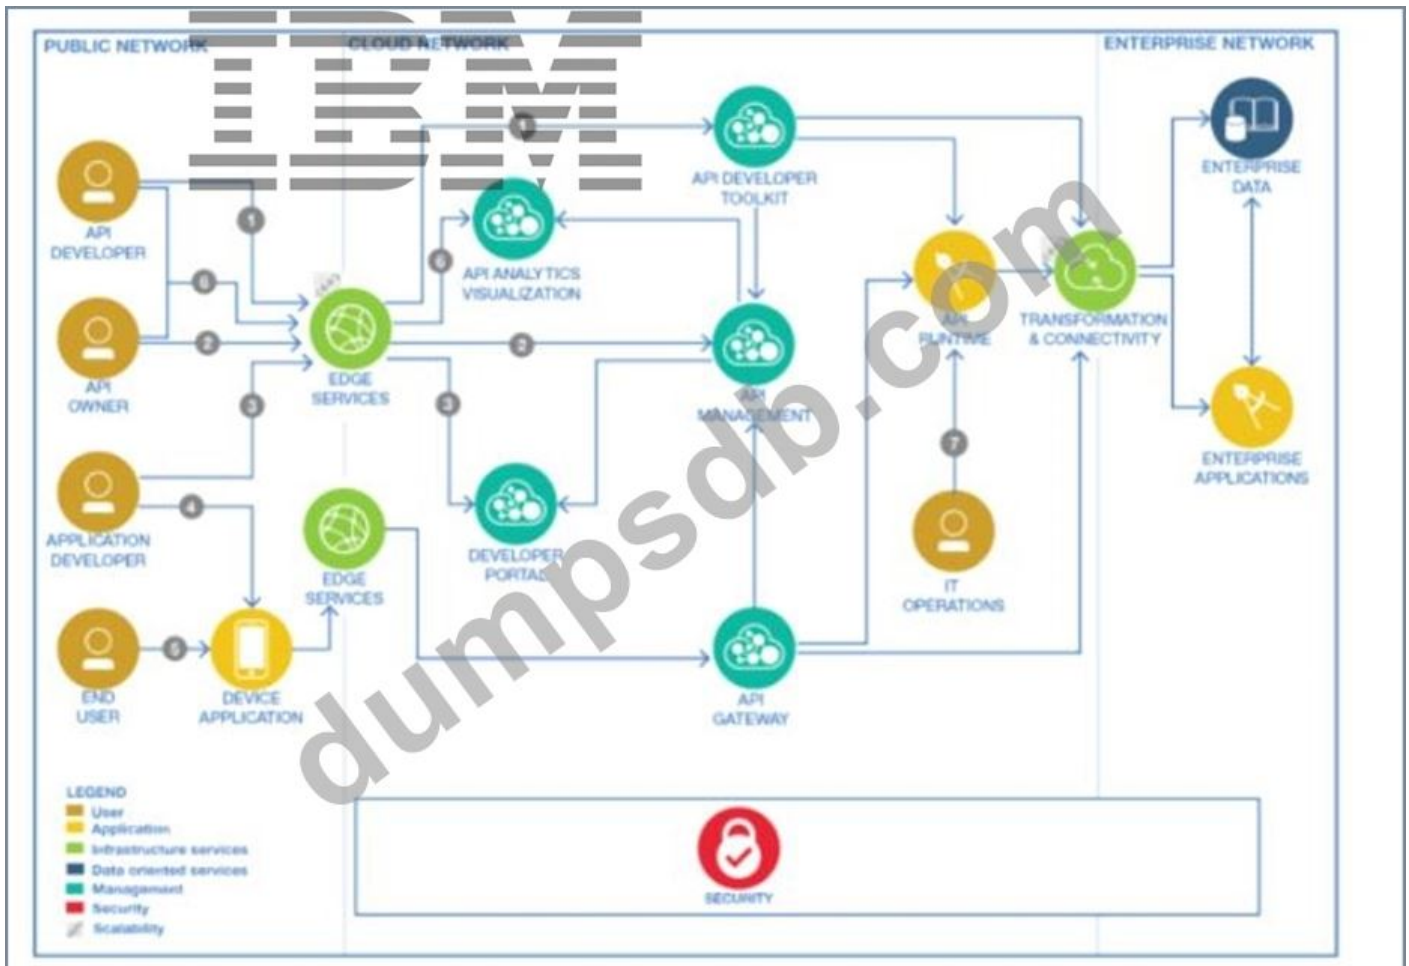

C. Asynchronous point-to-point access to services in closed heritage systems or heterogeneous backends

D. Synchronous access to fine-grained services across various backends

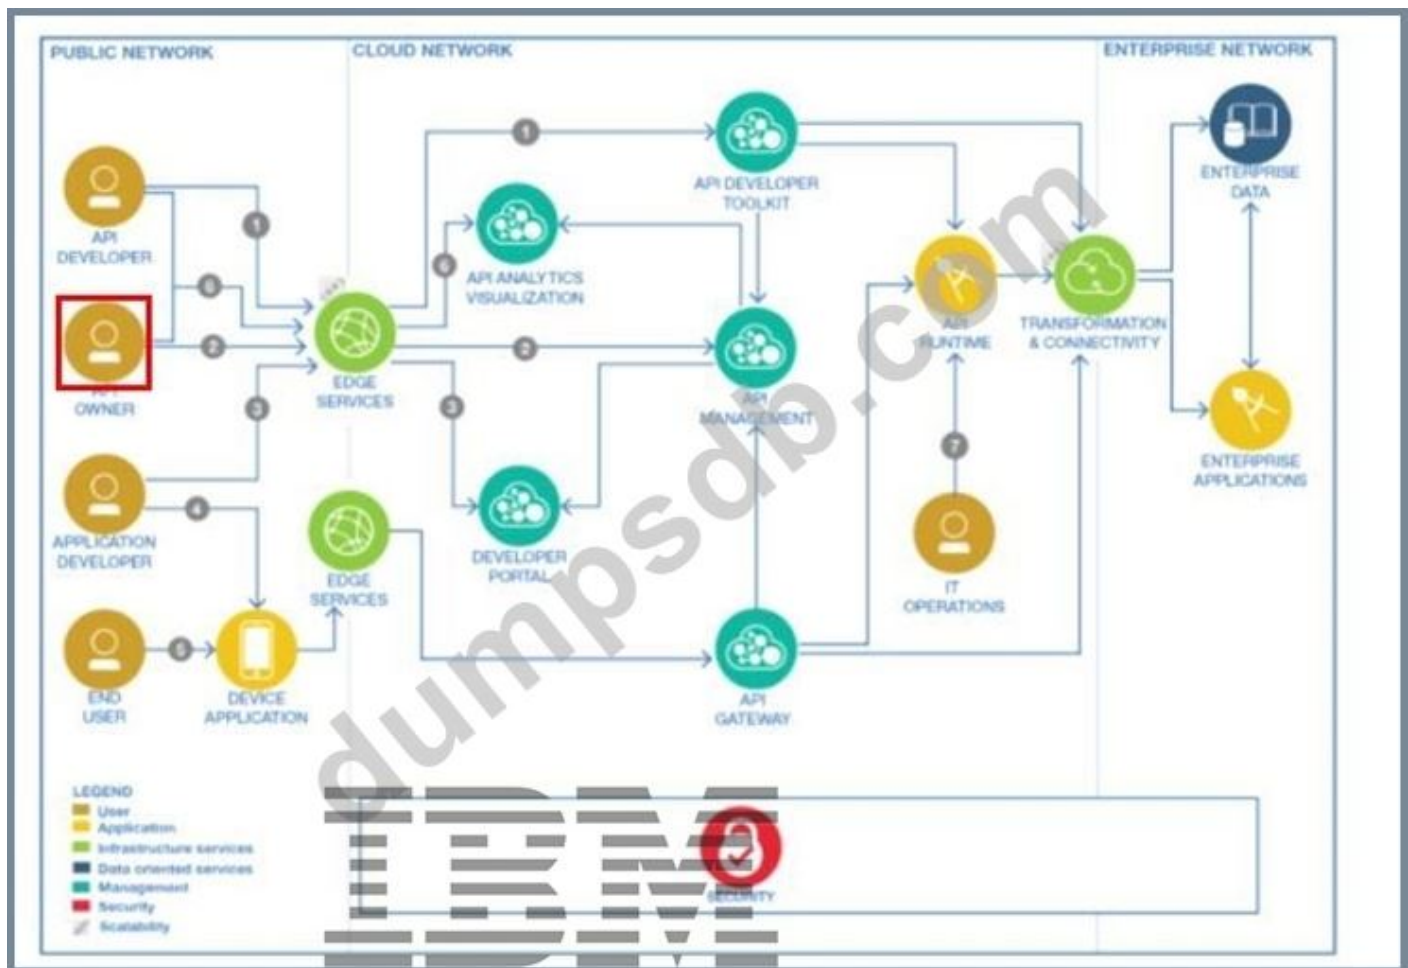

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 6

In the image below, select the user role that can include an API endpoint to existing API products and plans, specifies access control, and publishes the API to the developer portal for external discovery.

Answer:

NEW QUESTION: 7

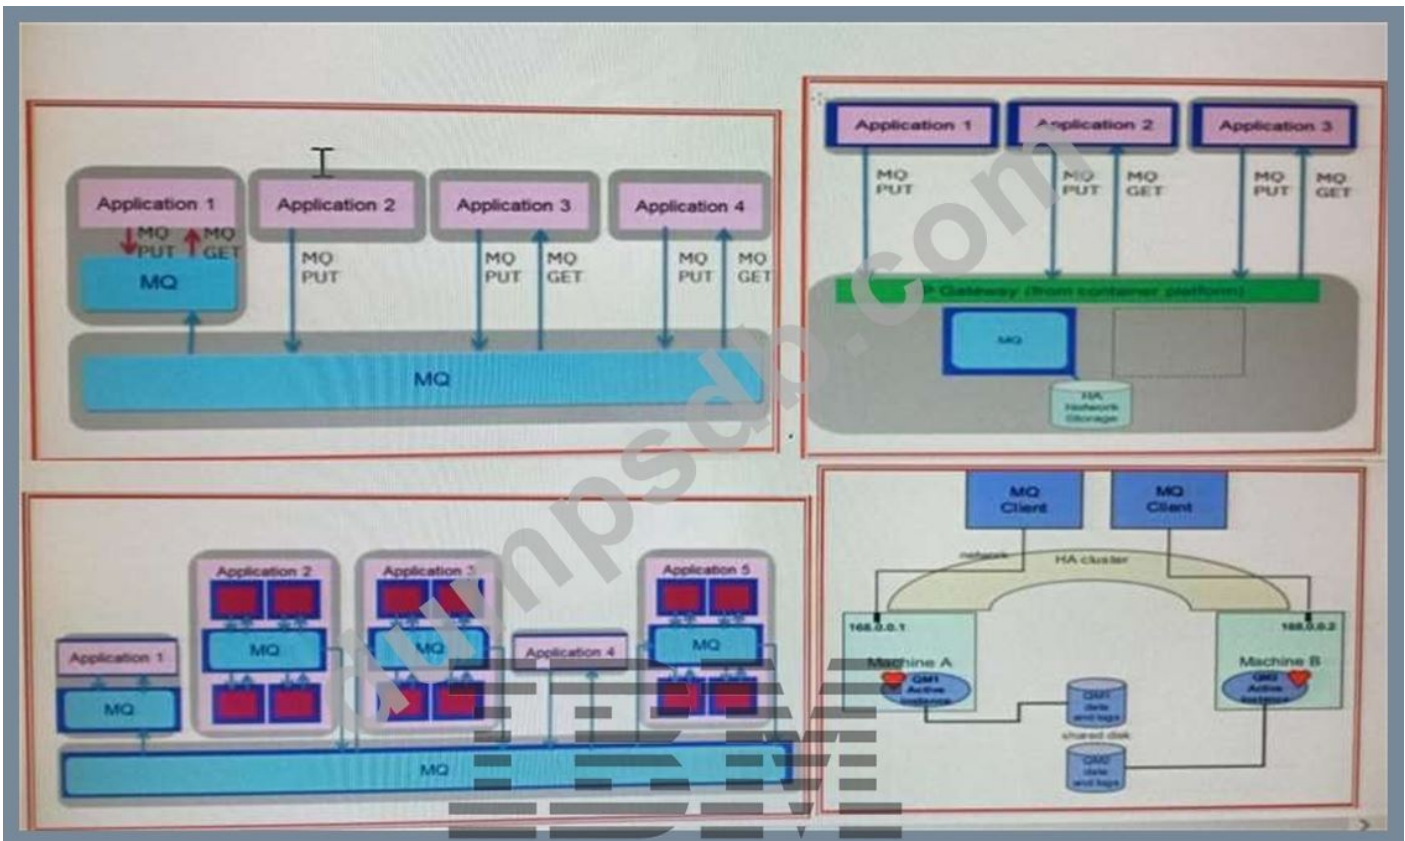

What is a significant challenge that is unique to hybrid messaging?

- A. Monitoring of privileged access to sensitive data and integrity of sensitive data in transit and at rest can be done only within the enterprise
- B. Build a scalable and high-throughput enterprise messaging backbone to support applications on the cloud
- C. Iterate quickly on the cloud and interact easily with enterprise systems of records
- D. Synchronous connection and distribution of events between cloud and on-premises systems

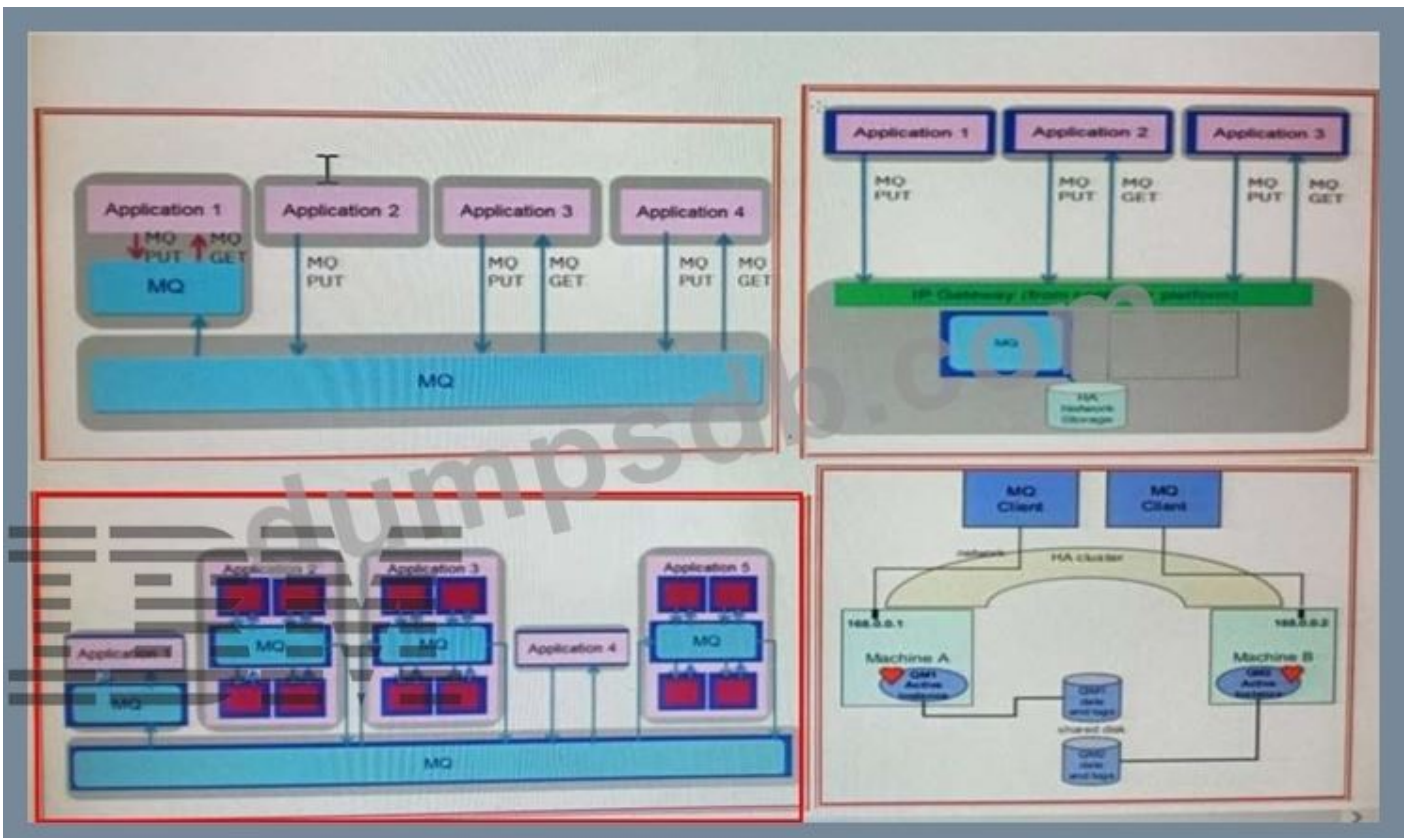

Answer: A (LEAVE A REPLY)

NEW QUESTION: 8

Click the diagram that shows a decentralized IBM MQ Containerized Architecture:

Answer:

NEW QUESTION: 9

Which Command Line interface tool provides an analyze method which validates resources configuration and print validation messages?

A. istioctl

- B. cloudctl
- C. calicoctl
- D. oc

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

What are two Aspera use cases?

- A. Data migration to, from, and between on-premises data centers and any major cloud
- B. Send and share large files and folders stored in on-premises data centers and major clouds
- C. Secure and reliable transfer of sensitive data, such as payment information, between applications
- D. Create distributed event-streaming platform to ingest a large volume of data in real-time
- E. Managed file transfer capabilities using messaging transport to move data

Answer: C,E ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which statement about the Container Storage Interface (CSI) drivers is true?

- A. They are integrated into the core OpenShift deployment
- B. They can be included as part of the container image for applications to access storage
- C. They are installed and configured in the host machines where the master nodes will run
- D. They are typically shipped as container images and have to be installed by a cluster administrator

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 12

What is the easiest way to consume an application residing outside of the boundaries of a cloud-native application?

- A. XML
- B. Java Functions
- C. node.js
- D. APIs

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 13

Which integration capability must be recovered prior to recovering an Aspera instance?

- A. MQ
- B. Event Streams
- C. API Connect
- D. DataPower Gateway

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 14

What is the key benefit of moving away from a centralized ESB pattern to Agile Integration?

- A. Multi-cloud deployment of integration artifacts
- B. Rapid creation of integrations using no-code approach
- C. Faster roll out of integrations, enhanced scalability, and resilience
- D. API-led integration enabling agility and innovation

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 15

Which two programming languages are available for the API Developer to use in the API Assemble Panel?

- A. XSLT
- B. Java
- C. .Net
- D. ESQL
- E. JavaScript

Answer: B,E ([LEAVE A REPLY](#))

NEW QUESTION: 16

Which component of Cloud Pak for Integration builds intelligent and responsive applications that react to events in real time?

- A. Message Broker
- B. Event Streams
- C. DataPower Gateway
- D. API Management

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 17

Which statement is true about IBM Event Streams?

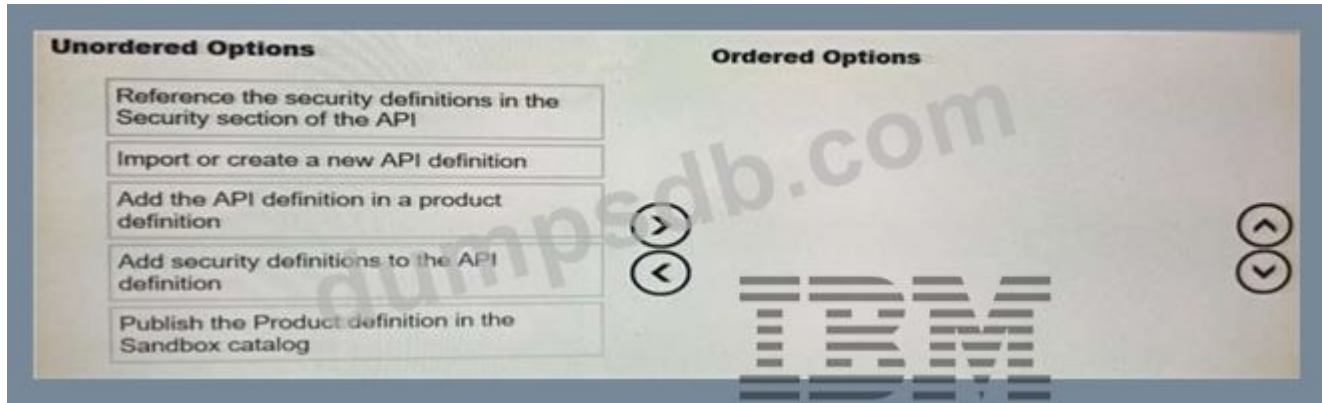

- A. A hierarchical Pub/Sub topic architecture is available
- B. By default the consumers offset is automatically committed in the background
- C. Persistent storage is enabled by default

D. All servers must be located in the same data center

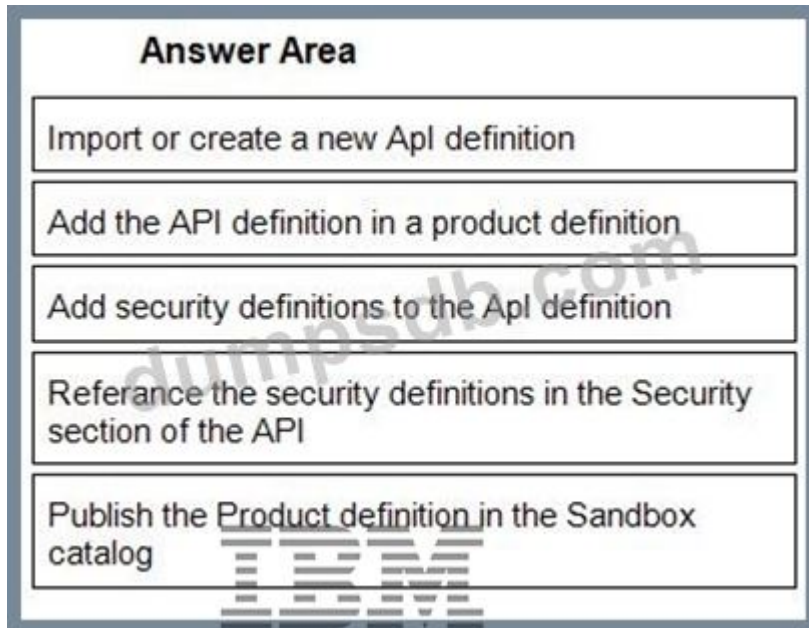

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 18

A new proxy API needs to be created, security added, and published to the Sandbox catalog. Which is the correct sequence of steps that should be taken to perform these tasks?

Answer:

- 1 - Import or create a new Apl definition
- 2 - Add the API definition in a product definition
- 3 - Add security definitions to the Apl definition
- 4 - Referance the security definitions in the Security section of the API
- 5 - Publish the Product definition in the Sandbox catalog

NEW QUESTION: 19

What are two characteristics of storage classes that are required for API management capability deployment?

- A. Depending on the use-case both block and file system storage classes are supported
- B. Only block storage classes are supported
- C. Any storage must be of type File System

- D. Block storage for distributed and file system storage for localized
- E. Requires an access mode of Read-Write-Many

Answer: A,E ([LEAVE A REPLY](#))

NEW QUESTION: 20

What is the function of Kibana in the Cloud Pak For Integration logging service?

- A. Capture, collect, and forward log data
- B. Query, discover, and visualize log data
- C. Collate, correlate, and interpret log data
- D. Index, search, and store log data

Answer: D ([LEAVE A REPLY](#))
