NEW QUESTION: 1

In addition to the automatic backup of your Oracle Database associated with a database deployment, you are planning to take an on-demand backup of a database on Exadata Cloud Service. How do you do this?

- A. Disable the automatic backup configuration and then take an on-demand backup.
- B. First connect to the Exadata Cloud Instance as the oracle user and then take a backup.
- C. Perform a recovery operation to a specific long-term backup.
- D. Use the Create Backup button in the backup section of the Database Details page.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 2

You have been brought in to help a company with slow nightly batch processing running on their Exadata Cloud Service. You have determined the workload is CPU-bound during the batch window. Which command line tool can be used to script increase or decrease OCPUs?

- A. oci cli
- B. exacli
- C. asmali
- D. ocpucli

Answer: A (LEAVE A REPLY)

NEW QUESTION: 3

You want to scale within Exadata System. Which of the following two statements are true? (Choose all correct answers)

- A. Modifying the number of enabled OCPU cores does not require database downtime.

- B. The setting of database parameter CPU_COUNT is affected by modifying the number of enabled OCPU cores.
- C. Modifying the number of enabled OCPU cores requires database downtime.
- D. The setting of database parameter CPU_COUNT is not affected by modifying the number of enabled OCPU cores.

Answer: (SHOW ANSWER)

NEW QUESTION: 4

What information is required to connect to the NoSQL Database Cloud Service?

- A. user ID, tenancy ID, component ID
- B. tenancy ID, passphrase, handshake key
- C. signing key fingerprint, API signing key, tenancy OCID
- D. API signing key, admin ID, user ID

Answer: C (LEAVE A REPLY)

NEW QUESTION: 5

When configuring connectivity for hosts in the VCN, security lists contain defaults for implementing security rules. Which TWO additional rules are needed for database systems?

(Choose all correct answers)

- A. allows SSH traffic from anywhere
- B. allows SQL*NET traffic from within the VCN
- C. allows ONS and FAN traffic from within the VCN
- D. allows Path MTU Discovery fragmentation messages

Answer: A,D (LEAVE A REPLY)

NEW QUESTION: 6

What THREE steps must you perform to connect to a MySQL database in the database system by using SSH and MySQL Shell?

- A. Add an ingress rule for port 20.
- B. Connect to the MySQL Database Service instance.
- C. Instantiate MySQL Shell on the MySQL database system instance.
- D. Start MySQL Shell on the compute instance.
- E. SSH into the compute instance from your local machine.

Answer: B,C,E (LEAVE A REPLY)

NEW QUESTION: 7

Which tool can be used to monitor a storage server in Exadata Cloud Service?

- A. OCI CLI
- B. exacli
- C. ocpucli
- D. dbaascli

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 8

The /u02 directory containing Oracle Homes (OH) is 80% utilized and you need to free up space in it. you own two Oracle Homes (OH193_A and OH193_B), each with a test database (193A and 193B respectively). You decide to consolidate both databases into a single Oracle Home (OH193. _A) to free up space. Which TWO actions must you perform? (Choose all correct answers)

- A. Copy the sqnet.ora file from OH193_B to OH193_A.
- B. Create a new container under OH193B and migrate the pluggable databases (PDBs) from 193B to 193A.
- C. Schedule a downtime window with the Test teams who use the 193B database.
- D. use the Move Database option from the console.

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 9

You notice that throttling is occurring on your NoSQL Database Cloud Service. What must you increase to solve this?

- A. OCPU for all servers in the cluster
- B. storage capacity
- C. storage capacity
- D. index size

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 10

Which tool should you use to run the LIST FLASHCACHE DETAIL command in the Exadata Cloud Service environment?

- A. exacli
- B. cellcli
- C. dbaascli
- D. OCI CLI

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which three actions can you perform on a DB system that has an Oracle Data Guard association with a standby database?

(Choose all correct answers)

- A. If the primary database becomes unavailable, then you can use Oracle Data Guard to fail over the standby database to the primary role.
- B. You can use the reinstate command to return a failed database into standby role after correcting the cause of failure.

- C. You can switch over the primary database to the standby role, perform maintenance on the standby database, and then switch it back to the primary role.
- D. You can terminate a primary database DB system.
- E. You can write on both primary and standby databases because DB system standby databases in Oracle Cloud Infrastructure Database are logical standbys.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 12

You want to permanently delete the DB System and its attached HeatWave cluster. Which action should you perform?

- A. Terminate the DB system and drop the associated HeatWave Cluster.
- B. Delete the Heatwave Cluster and it will also delete the DB system.
- C. Delete the DB system and it will also delete the attached HeatWave Cluster.
- D. Drop the DB system and terminate the associated HeatWave Cluster.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 13

In Exadata Cloud Service, you use Oracle Data Guard for disaster recovery. What is the minimum egress requirement needed to enable Data Guard between Exadata Cloud Services?

- A. Tcp traffic only for port 22
- B. Tcp traffic only for port 1521 and port 22
- C. Open for all protocols
- D. Tcp traffic only for port 1521

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 14

Which two circumstances are FALSE when you use the Console to recover a DB system database from a backup stored in Oracle Cloud Infrastructure Object Storage? (Choose all correct answers)

- A. Restore the database from an unmanaged backup in Object Storage created directly by using RMAN.
- B. Restore the database from a backup in Object Storage that was created by using the Console or the API.
- C. You want to restore to an existing System Change Number (SCN).
- D. Data Guard must be disabled, or you must first remove the Data Guard association by terminating the standby database before you can restore the database.
- E. The pp system has no access to the Oracle Cloud Infrastructure Object Storage service location where the backup is stored.

Answer: A,E ([LEAVE A REPLY](#))

NEW QUESTION: 15

What TWO reasons do you need a minimum of three storage cells when using Exadata Cloud Service?

(Choose all correct answers)

- A. for Data Guard
- B. for Real Application Clusters
- C. for high availability
- D. for Fast Start Failover of storage cells
- E. for triple mirroring of data

Answer: C,E (LEAVE A REPLY)

NEW QUESTION: 16

What NoSQL Database Cloud Service API statement can be used to adjust table capacity?

- A. tableRequest
- B. tableProvision
- C. tableunits
- D. tableLimits

Answer: A (LEAVE A REPLY)

NEW QUESTION: 17

You want to move an Exadata Cloud@Customer VM cluster to a different OCI compartment for increased isolation from other teams that use Exadata. What happens when you use the console to do this?

- A. The VM cluster, compute nodes, and underlying Exadata infrastructure will move to the new compartment. All other resources remain the same.
- B. After it is deployed, a VM cluster cannot change compartments.
- C. The VM cluster and associated databases will move to the new compartment. All other resources will remain in the existing compartment.
- D. The vm cluster, compute nodes, and associated databases will move compartments. All other resources will remain in the existing compartment.

Answer: D (LEAVE A REPLY)

NEW QUESTION: 18

Which are THREE strategies to migrate Oracle Database to Oracle Cloud Infrastructure (OCI)?

(Choose all correct answers)

A. Zero Downtime Migration (ZDM)

B. Autonomous migration

C. GoldenGate

D. migration workbench

E. Real Application Clusters (RAC)

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 19

Which THREE Oracle Cloud Infrastructure (OCI) services can be used to connect to on-premises networks?

(Choose all correct answers)

A. IPSec VPN

B. Dynamic Routing Gateway (DRG)

C. Service Gateway

D. Internet Gateway

E. Fastconnect

Answer: A,B,E (LEAVE A REPLY)
