

Oracle.1z0-998-21.v2022-04-25.q25

Exam Code:	1z0-998-21
Exam Name:	Oracle Database Cloud Service 2021 Specialist
Certification Provider:	Oracle
Free Question Number:	25
Version:	v2022-04-25
# of views:	680
# of Questions views:	250
https://www.dumpsdb.com/dumps/Oracle/1z0-998-21/Oracle.1z0-998-21.v2022-04-25.q25	

NEW QUESTION: 1

Which two statements are true about using the Object Storage for the backups?

- A. Availability is low but the durability of the backup is high.
- B. Virtual Cloud Network must be configured with dynamic routing gateway.
- C. Availability and durability of the backup is high.
- D. Virtual Cloud Network must be configured with an internet gateway.
- E. Availability is high but the durability of the backup is low.

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 2

Which two complexities must be applied to the Database Admin passwords?

- A. Special characters must be _, #, or -.
- B. Password must be 16 characters and contain at least two uppercase, two lowercase, two special, and two numeric characters.
- C. Password must be 9 to 30 characters and contain at least two uppercase, two lowercase, two special, and two numeric characters.
- D. Password must be 8 to 24 characters and contain at least one uppercase, lowercase, special, and numeric characters.

Answer: A,C (LEAVE A REPLY)

<https://docs.oracle.com/database/121/DBSEG/authentication.htm#DBSEG3225> This function checks for the following requirements when users create or modify passwords:

The password must contain at least 2 upper case characters, 2 lower case characters, 2 numeric characters, and 2 special characters. These special characters are as follows:

' ~ ! @ # \$ % ^ & * () _ - + = { } [] \ / < > , . ; ? ' : | (space)

The password must differ from the previous password by at least 4 characters.

The following internal checks are also applied:

The password contains no fewer than nine characters and does not exceed 30 characters.

The password does not contain the double-quotation character ("). It can be surrounded by double-quotation marks, however.

NEW QUESTION: 3

You want to migrate the Oracle workload along with the third party apps to OCI without re-architecting. Which method enables the migration of environment from on-premises to OCI?

- A. Backup and recovery
- B. Lift and shift
- C. Infrastructure heavy workloads
- D. Cloud native workloads

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 4

Which three are the features of the manageable boot disks for compute instances?

- A. By default, all the boot volumes are encrypted.
- B. Boot volumes can be reused with new instances but with same shapes.
- C. A boot volume can be associated with more than one instance.
- D. Boot volume can be preserved after an instance is terminated and can be reused with a new instance.
- E. Boot volumes help the instances to be launched faster than usual.

Answer: A,D,E ([LEAVE A REPLY](#))

<https://blogs.oracle.com/cloud-infrastructure/announcing-boot-volumes-for-oracle-cloud-compute>

NEW QUESTION: 5

You want to launch a DB system that is less expensive and can be used for test and dev environments. Which type of DB system would satisfy the requirement?

- A. VM DB system
- B. Bare metal DB system
- C. Exadata DB system
- D. Autonomous transaction processing

Answer: ([SHOW ANSWER](#)**)**

NEW QUESTION: 6

You administer a database that is configured in ARCHIVELOG mode. A full RMAN backup exists. In which two scenarios is RMAN incomplete recovery required?

- A. if all members of the CURRENT online redo log group are lost
- B. if all members of an ACTIVE online redo log group are lost when attempting to open the database

- C. if a copy of the multiplexed control file is lost
- D. if SYSTEM tablespace data file is lost
- E. if the data file of an UNDO tablespace that is in use is lost

Answer: C,D (LEAVE A REPLY)

NEW QUESTION: 7

Examine the steps to enable a port on the DB system.

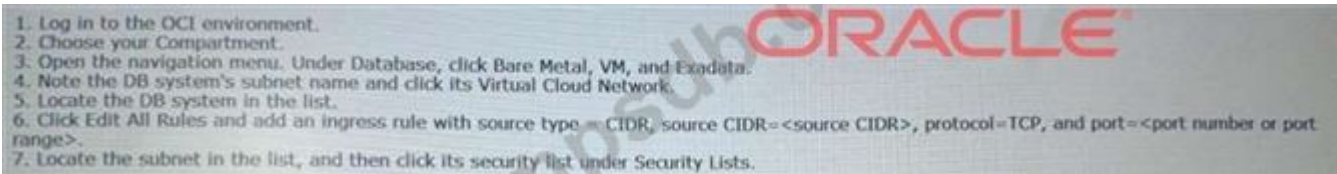

Identify the required steps in the correct order.

- A. 2,5,3,4,6,7 :
- B. 1,5,3,4,6,7
- C. 1,3,5,6,4,7
- D. 2,3,5,6,4,7

Answer: (SHOW ANSWER)

NEW QUESTION: 8

You want to connect to a DB system from your local system, for that you need to update the security list. Examine the steps to update the security list:

Identify the required steps in the correct order.

- A. 1,3,2,5,4,7,6
- B. 1,2,3,5,4,6,7
- C. 1,3,2,4,5,6,7
- D. 3,1,2,4,5,7,6

Answer: B (LEAVE A REPLY)

NEW QUESTION: 9

Which two statements are true about the API Signing Key?

- A. RSA key pair in PEM format must have minimum of 1024 bits.
- B. It must be generated with a passphrase.
- C. It is a RSA key pair in the PEM format.
- D. It is required when using OCI API in conjunction with the SDK/CLI.

Answer: C,D (LEAVE A REPLY)

https://docs.cloud.oracle.com/en-us/iaas/pdf/ug/OCI_User_Guide.pdf

NEW QUESTION: 10

What is the retention period for automatic incremental backups in Object Storage?

- A. 30 days
- B. 180 days
- C. 90 days
- D. 7 days

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which two statements are true about "LICENSE INCLUDED" and "BRING YOUR OWN LICENSE (BYOL)" options while creating a DB system?

- A. BYOL includes no extra cost for OCI and Oracle Database.
- B. License included includes the cost of OCI only.
- C. BYOL includes the cost of OCI only.
- D. BYOL includes the cost of the Oracle Database only.
- E. License included includes the cost of OCI and Oracle Database license.

Answer: A,E ([LEAVE A REPLY](#))

<https://docs.cloud.oracle.com/en-us/iaas/Content/Database/Concepts/databaseoverview.htm>

License Types and Bring Your Own License (BYOL) Availability Oracle Cloud Infrastructure supports a licensing model with two license types. With License included, the cost of the cloud service includes a license for the Database service. With Bring Your Own License (BYOL), Oracle Database customers can use existing licenses with Oracle Cloud Infrastructure. Note that Oracle Database customers remain responsible for complying with license restrictions applicable to their BYOL licenses, as defined in their program order for those licenses.

You do not need separate on-premises licenses and cloud licenses. BYOL databases support all advanced Database service manageability functionality, including backing up and restoring a DB system, patching, and Oracle Data Guard.

You can choose BYOL when you launch an Oracle Cloud Infrastructure database or DB system. Choosing BYOL impacts how the usage data for the instance is metered and subsequent billing. Note that on some provisioning dialogs in the Console, the BYOL option is labeled My Organization Already Owns Oracle Database Software Licenses.

NEW QUESTION: 12

What is true about the creation of subnets in a VCN?

- A. While creating a subnet, security lists must be specified.
- B. A subnet is created in multiple availability domains for high availability.
- C. While creating a subnet, the route table must be specified.
- D. A subnet is created in a single availability domain.

Answer: D ([LEAVE A REPLY](#))

SUBNETS

Subdivisions you define in a VCN (for example, 10.0.0.0/24 and 10.0.1.0/24). Subnets contain virtual network interface cards (VNICs), which attach to instances. Each subnet consists of a contiguous range of IP addresses that do not overlap with other subnets in the VCN. You can designate a subnet to exist either in a single availability domain or across an entire region (regional subnets are recommended). Subnets act as a unit of configuration within the VCN: All VNICs in a given subnet use the same route table, security lists, and DHCP options (see the definitions that follow). You can designate a subnet as either public or private when you create it. Private means VNICs in the subnet can't have public IP addresses. Public means VNICs in the subnet can have public IP addresses at your discretion. See Access to the Internet. <https://docs.cloud.oracle.com/en-us/iaas/Content/Network/Concepts/overview.htm>

NEW QUESTION: 13

Which three statements are true about the OCI Object Storage Service?

- A. It can store finite amount of unstructured data, analytical data, and rich content.
- B. It does not support the private access from OCI resources in a VCN through a service gateway.
- C. It is a high performance storage platform that offers reliable and cost-efficient data durability.
- D. It is tied to a specific compute instance.
- E. It allows to store or retrieve data directly from the internet or from within the cloud platform.
- F. It allows to save the data in Object Storage bucket over the OCI backbone.

Answer: (SHOW ANSWER)

NEW QUESTION: 14

Which three components are created along with the creation of a Virtual Cloud Network (VCN)?

- A. Internet Gateway
- B. Dynamic Routing Gateway
- C. NAT Gateway
- D. Default Security List
- E. Route Table

Answer: (SHOW ANSWER)

<https://www.oracle.com/a/ocom/docs/vcn-deployment-guide.pdf>

NEW QUESTION: 15

Examine the steps to create a backup using CLI:

1. Log in to DB system with `opc` user and `sudo` to `root` user.
2. Log in to DB system with `opc` user and `sudo` to `oracle` user.
3. Get the ID of the database.
4. Create a backup configuration.
5. Get the ID of the backup configuration.
6. Associate the backup config ID with the database ID.
7. Create the database backup.

Identify the required steps in correct order.

- A. 2,4,3,5,6,7
- B. 1,4,3,5,6,7
- C. 1,3,4,5,6,7
- D. 2,3,4,5,6,7

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 16

You created a new PDB in a VM DB system and while creating a tablespace in the PDB an error is returned:

ORA-28374: typed master key not found in wallet.

What could be the possible reason?

- A. TDE wallet is corrupted or lost.
- B. Master key encryption is not activated for the new PDB.
- C. TDE wallet does not exist.
- D. Entry for the TDE wallet in the `sqlnet.ora` is missing.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 17

Which four are the advantages of migrating to Oracle Cloud Infrastructure?

- A. supports RAC options only for bare metal shapes
- B. allows to run clustered databases on virtual machine DB systems
- C. performs automatic backups to object storage
- D. is integrated with Exadata to provide high performance, availability, and scalability

E. has three way mirrored storage

F. has automated data Guard configuration for both primary and standby systems available across availability domains only

Answer: C,D,E,F (LEAVE A REPLY)

NEW QUESTION: 18

Which two are the minimum prerequisites to launch a DB system?

A. Private key in OpenSSH format

B. Virtual Cloud Network with default service gateway

C. Virtual Cloud Network with default security list

D. Public key in OpenSSH format

E. Dynamic Routing Gateway

Answer: (SHOW ANSWER)

NEW QUESTION: 19

You want to enable the EM Express console for a database in the DB system. Which procedure/function would you use?

A. DBMS_XDB_CONFIG.SETLISTENERENDPOINT

B. DBMS_XDB_CONFIG.GETHTTPSPORT

C. DBMS_XDB_CONFIG.SETHTTPSPORT

D. DBMS_XDB_CONFIG.GETHTTTPORT

Answer: C (LEAVE A REPLY)

<https://www.oracle.com/technetwork/database/manageability/emx-intro-1965965.html>

NEW QUESTION: 20

Examine the exhibit:

How many CPU cores and memory would a DB system would get after successful creation?

A. 16 CPU cores and 320 GB of memory

B. 2 CPU cores and 256 GB of memory

- C. 32 CPU cores and 256 GB of memory
- D. 24 CPU cores and 320 GB of memory

Answer: D (LEAVE A REPLY)

NEW QUESTION: 21

What is the use of port 6200 on a DB system?

- A. Oracle Enterprise Manager Database Console
- B. EM Express Console
- C. Oracle High Availability Services
- D. Oracle Notification Services (ONS)

Answer: D (LEAVE A REPLY)

https://docs.oracle.com/cd/E11882_01/install.112/e41962/ports.htm#RILIN1179

NEW QUESTION: 22

Examine the exhibit:

Which three statements are true about the DB system that would be created?

- A. CPU core count of the DB system can be increased after the creation.
- B. DB system will have 2 CPU cores and 24 GB memory.
- C. VM DB system will be created.
- D. DB system will have 24 CPU cores and 320 GB memory.
- E. Storage can be scaled up after the creation of the DB system.

Answer: C,D,E (LEAVE A REPLY)

NEW QUESTION: 23

Examine the command:

```
dbcli describe-component
```

What information will you get by executing this command?

- A. displays all the components related to the Object Storage

- B. displays the latest patch available for the DB system
- C. displays all the storage objects created
- D. displays the installed patch versions for the DB system

Answer: D (LEAVE A REPLY)

<https://docs.cloud.oracle.com/en-us/iaas/Content/Database/References/dbacl.html> Use the dbcli describe-component command to show the installed and available patch versions for the server, storage, and/or database home components in the DB system.

NEW QUESTION: 24

You want to migrate your database from on-premises to OCI with no downtime. Which method would you use?

- A. SQL Developer
- B. Data Guard
- C. Data Pump
- D. Golden Gate

Answer: B (LEAVE A REPLY)

The Oracle Zero Downtime Migration tool follows a simple single button approach, is fully MAA-compliant and scales to your fleet needs. Oracle ZDM leverages Oracle Data Guard in order to provide an automated migration for your on-premises database to the Oracle Cloud; all of this, with a five step process that analyzes both the source and target, prepares both databases, migrates your data, provides monitoring and then a controlled switchover of the application to your newly migrated database in the Oracle Cloud.

<https://blogs.oracle.com/database/oracle-move-successfully-migrate-your-data-to-the-oracle-cloud>

NEW QUESTION: 25

You want to migrate a schema from on premises database to OCI database. Which two can be used to achieve this?

- A. Data Guard
- B. SQL Developer
- C. Data Pump
- D. Golden Gate

Answer: A,D (LEAVE A REPLY)
