NEW QUESTION: 1

Ar.mo Corporation is designing an Order Fulfillment application built on an Inventory application. Both applications reuse a section that displays Part details.

Where do you configure the PartOetails section?

- A. In an Enterprise ruleset within the Inventory application's Paits data class
- B. In an Order Fulfillment luleset within the Order Fulfillment application's Parts data class
- C. In an Inventory ruleset within the Inventory application's work pool class
- D. In an Order Fulfillment ruleset within the Order Fulfillment application's work pool class

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 2

A shipping case needs to wait n specific time period before progressing in its flow. The developer is considering using ;i wait shape or an assignment with an SI A to perform this (unction.

Identify the two requirements for which a wait shape is the simpler approach. (Choose Two)

- A. Adjust the case urgency when the assignment is created.
- B. Present a custom UI form to the user while waiting to expire.
- C. Automatically bypass locking when the assignment is created.
- D. Manually step past the waiting point prior to the designated time.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

How do you begin your research to diagnose the cause of the reported performance issue?

- A. Look at the performance profile and DB Trace out put from each node.
- B. Observe the cluster and node status on the Enterprise Health Console.

C. Review guardrail warnings in the development environment to determine if any rules with warnings moved to production.

D. Download the alert log file from each node and analyze the contents in the Pega Log Analyzer.

Answer: B (LEAVE A REPLY)

Explanation

Six weeks after you deliver your application to production, your users report that the application slows down in the afternoon. The application is almost completely unresponsive for some users shortly after 3:00 P.M. Other users do not experience this problem until later in the day.

You do not have access to the Production environment, but you do have access to AES. The production environment has three nodes and a load balancer.

You need to resolve this issue because a new division of the organization will start using the application next month.

NEW QUESTION: 4

BigCo has two development projects currently in progress developed by independent teams. One team builds the Quoting application. Another team builds the Policy Administration application. Development takes place on different servers with separate rulebases.

The Quoting application is built on the Policy Administration application.

The Policy Administration application requires enhancements to support other areas of the business.

The Quoting team is notified when the Policy Administration application is versioned. The Quoting team responds by importing a HAP containing the new version.

Select the two best practices to minimize potential development conflicts and work with the most current version of the Policy Administration application. (Choose Two)

A. Perform branch reviews when merging branches.

B. Share rulebases between both applications.

C. Periodically rebase the Policy Administration application.

D. Switch between applications when modifying rules.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 5

MyMealth Corporation wants to use the age of the claim to increase the urgency on the assignment so that claims processors work on the most urgent claims first. The claim assignment urgency increases by 1 each day the claim remains in an unresolved status. At any time, My Health has up to 10,000 claims in process. Claims in the PendingProcessing workbasket are subject to this calculation. The application updates the claim urgency daily before the work day begins. AM claims are processed within 30 days.

MyHealth also processes complaint cases from health plan members. Complaint cases use a service level agreement (SLA) to ensure the customer service representatives respond to complaints within 48 hours. All claims processors work in Los Angeles 9:00 AM-5:00 PM PST.

Which approach satisfies the claim urgency requirement and provides the best experience for the claims processor?

A. Use the assignment SLA to increment the pyUnjencyAssiqnAdjust value by 1 every day the claim is in an open status.

- B. Use the overall SLA to increment the pyUrgencyAssignAdjust value by 1. Reset the goal date to the following day
- C. Use an advanced agent on a dedicated node to increment the pyUrgencyAssignAdjust value by 1 for every assignment that matches the selection criteria.
- D. Use a declare expression to increment the pyUrgencyAssignAdjust value to 1. When a claim processor opens the assignment, the urgency is increased by 1.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 6

You are using pega express. You want to avoid creating unnecessary case-level properties and views. Which three actions do you take to accomplish this goal? (choose three)

- A. Drag-and-drop a Field Group when defining a case view.
- B. Pre-define properties, sections, and relevant records that are applied to Work-Cover'.
- C. Create a data type that corresponds to each case type.
- D. Add an embedded Page property to the case type.
- E. Define case type views using "\ page, property" syntax for the majority of the- fields.

Answer: A,B,C ([LEAVE A REPLY](#))

NEW QUESTION: 7

An application is being constructed in multiple phases for a growing company that has over 1000 employees. During the initial development stages, it is determined a button on a section has to be made conditionally visible based on a group of actors.

What should the conditional visibility be based on to minimize the amount of future maintenance?

- A. Privilege
- B. AccessGroup
- C. Work group
- D. Role

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 8

Identify three rule types that are used in defining Authentication Service data instances. (Choose Three)

- A. Data pages
- B. Activities
- C. Data transforms
- D. Connectors
- E. Reports

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

Which three approaches are considered a PegaUnit: testing best practice? (Choose Three)

- A. A test case focuses on a single area of functionality.
- B. A test ruleset is placed at the top of an application's ruleset stack.

- C. A test case is not necessary when an error message is the expected result.
- D. A test case uses limited assertions.
- E. A test case groups relevant assertions together.

Answer: A,C,D (LEAVE A REPLY)

NEW QUESTION: 10

An application contains cases which transition through different statuses throughout their life cycle which typically lasts 3 months.

Design a reporting strategy to display the number of cases by status at the end of each month for a 12-month period.

- A. Configure a Declare index to record case data to a separate table.
- B. Configure an activity to generate the data in the clipboard and report using a custom section.
- C. Configure a summary report that leverages sub reports for each month.
- D. Configure an agent to record monthly case status in a separate table and report on that table.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 11

XYZ Corporation wants to ensure that every attempt by a developer to check a rule into a certain ruleset version is reviewed before that rule is allowed to be checked in. The rule should be automatically sent back to the developer without being checked in if all warnings are not justified and the fields on the history tab are not complete.

How do you address this requirement?

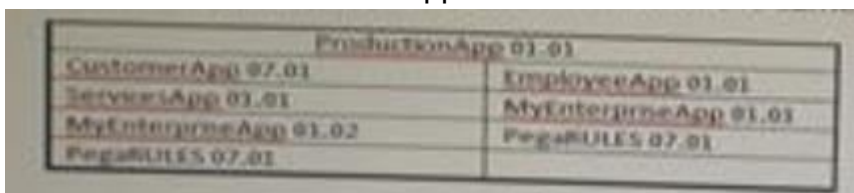

- A. Override the FindReviewers decision tree to invoke a when rule that evaluates the criteria, if the when rule returns true, the decision tree returns SendBack.
- B. Implement a CheckForCustomWarnings activity for each rule included in the requirement. The activity issues a warning whenever the requirement's history tab criteria are not met.
- C. Prior to the first assignment in the ApproveRuleCheckin flow, add a decision shape where one output connector is equivalent to the submitting the SendBack flow action.
- D. Override the SendBack Flow Action adding a pre-activity that transfers the assignment to the create operator if the rule's criteria are not met.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 12

The following figure depicts a hierarchy of applications that are built on other applications.

Specifically, the productionapp application is built on applications customerapp and employeeapp. Each of these applications has additional built-on applications, including the duplicated MYEnterpriseApp application, which has two different versions in use. All applications are built on the same version of PegaRUUS.

Answer:

Explanation

ProductionApp 01.01 CustomerApp 07.01 ServiceApp 01.01 EmployeeApp 01.01 MyEnterpriseApp 01.02 PegaRULES 07.10

NEW QUESTION: 13

BigCo receives complaints from existing customers and new prospects that BigCo repi irrelevant offers and products. Which two Pega solutions do you suggest to help solve this problem? (Choose Two)

- A. Pega Marketing
- B. Robotic Process Automation
- C. Pega Customer Service
- D. Customer Decision Hub

Answer: [\(SHOW ANSWER\)](#)

NEW QUESTION: 14

The SLA and the customer's system administrator are reviewing scenarios that do not require an application server restart. Select three scenarios from this list. (choose three)

- A. When changing the prweb web.xml file
- B. When changing the system name
- C. When the deploying new rules
- D. When the prlogging.xml file is modified
- E. When deploying rule only hotfixes

Answer: C,D,E [\(LEAVE A REPLY\)](#)

NEW QUESTION: 15

Users in a cloud-based production application report a chronic performance issue that occurs every day between 2:0 P.M. and 4:00 P.M. All attempts to reproduce the problem in the Development, QA, and Staging environments have (ailed).

Which two techniques help you troubleshoot the problem? (Choose Two)

- A. Review Performance Alerts and Exceptions in AES.
- B. Review Alerts and Exceptions using PLA.
- C. Review a Production Tracer Log using SMA-
- D. Review Performance Alerts and Exceptions in PDC

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 16

What advantage does a rule-utility-function have over a rule-obj-activity?

- A. Ability to be used to enforce security
- B. Ability to be circumstanced
- C. Ability to be directly called from a decision table
- D. Ability to be saved multiple rulesets

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 17

You are working on an insurance claims application that receives claims through email. The company receives 500 emails per hour. the insurance company promises a 24-hour response time to receives and verify the claim. After the claim is verified. The system automatically responds with email containing the claim ID. The application is developed in the Pega cloud environment. The production environment is currently running on premises.

What is your recommendation to ensure that insurance company can meet the 24-hour response time requirement for claims submitted by email?

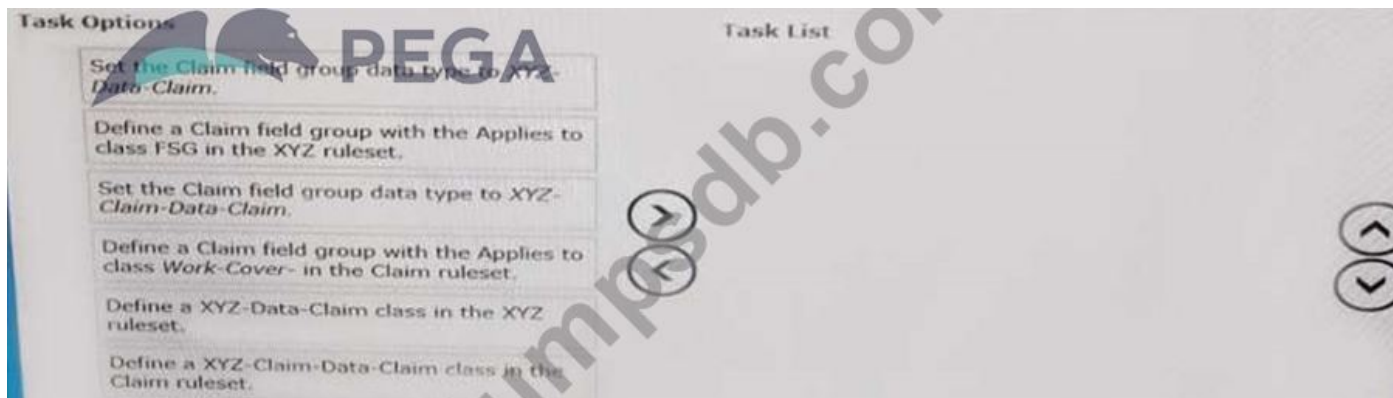

- A. Recommend the insurance company change its policy to allow for a broader processing window.
- B. Recommend the insurance company use an email listener with concurrent threads.
- C. Recommend the insurance company use an advanced agent to verify claims and respond.
- D. Recommend the insurance company use an MDB listener instead of an email listener.

Answer: A ([LEAVE A REPLY](#))

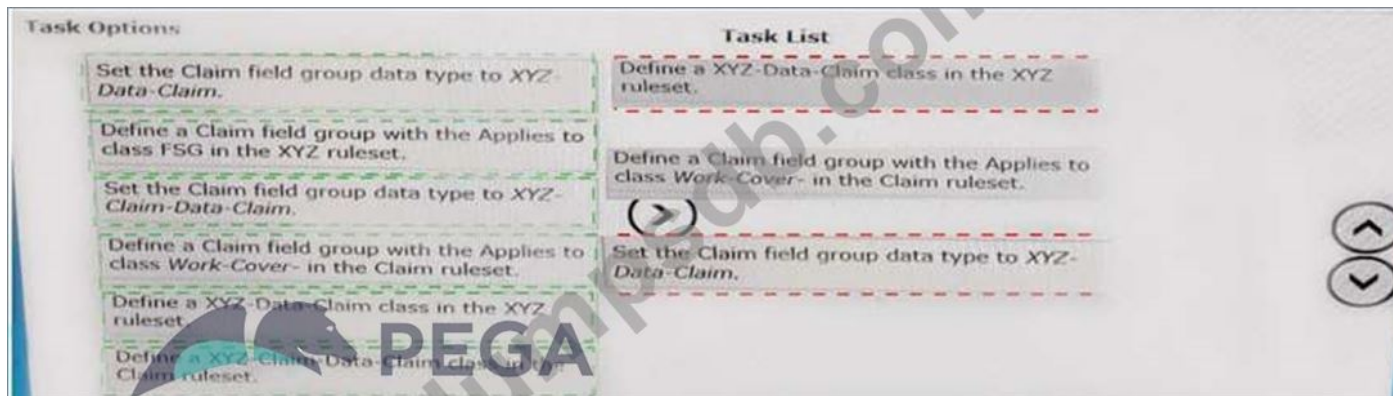

NEW QUESTION: 18

XYZ Inc.'s COE wants case life cycle developers to use a field group named "Claim" regardless of the application being developed.

Select and move the three tasks that the COE performs for this requirement to the Task List column and place them in the correct order. (Choose Three)

Answer:

NEW QUESTION: 19

Which of the following Skin rule customizations help satisfy the states requirements?

- A.** In the Skin rule, configure the importance field for each column included in a repeating layout.
- B.** In the Skin rule, configure the Column Layout and specify the width of the sidebar on desktops.
- C.** In the Skin rule, configure the Column Layout and specify how the sidebar appears on tables and smart phones.
- D.** In the Skin rule, configure the style for all application field values, paragraphs, and correspondence records.

Answer: A (LEAVE A REPLY)

Explanation

You are designing an accessible Pega application for French and English-language users who require assistive technologies. The application must be able to run from desktop, tablet, and mobile phone browsers. Also, several screens require the ability to save changes and refresh the screen.

NEW QUESTION: 20

An end user of the application experienced a browser crash while working on a highly available system. Crash recovery is enabled. Does the user to be reauthenticated?

- A.** No, if the authentication cookie was lost
- B.** Yes, if the user is directed to the same node.
- C.** Yes, If the authentication cookie was lost.
- D.** No, if the user is directed to a different node.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 21

When do you use the load-datapage activity method?

- A. To initiate the loading of a data page
- B. To refresh a data page
- C. To run a connector asynchronously
- D. To queue the data page for a default agent

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

You manage a 30-person development team with members located across the globe.

Which Pega Cloud environment best supports the needs of your team?

- A. Large sandbox
- B. Large development instance
- C. Preproduction instance
- D. Standard sandbox

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 23

Client XYZ Corp implemented Pega Customer Service.

A customer service representative (CSR) needs to launch multiple applications to manually update information to keep data synchronized across systems. The applications are built in different technologies, decreasing the CSR's efficiency in handling customer requests. The client has a requirement to launch all applications from the PLCJA Customer service application. The client requires that data flows to and from the Pega Customer Service application to the other applications used by the CSR. Changes made in any one of the systems is reflected in other relevant systems. This results in the CSR handling customer requests more efficiently and spending less time manually updating dependent applications.

Which Pega capability do you recommend to support this requirement?

- A. Use Robotic Process Automation.
- B. Use SOAP/REST services to update the information.
- C. Use SQL connectors to update the data.
- D. Use Robotic Desktop Automation.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 24

APP Studio created a data type in the Organization layer for Quote data called BCO-Data Quote. How do you help users find rules from this data class when working in APP Studio?

- A. Select each rule you want to reuse in the application as a relevant record.
- B. Create a BCO-QI -Data-Quote class that inherits from BCO Data-Quote.
- C. Use a Data Reference to configure the rules that you need from the BCO-Data-Quote class.
- D. Copy the fields in the data class to the BCO QT Work- class so all subclasses can see the Quote rules.

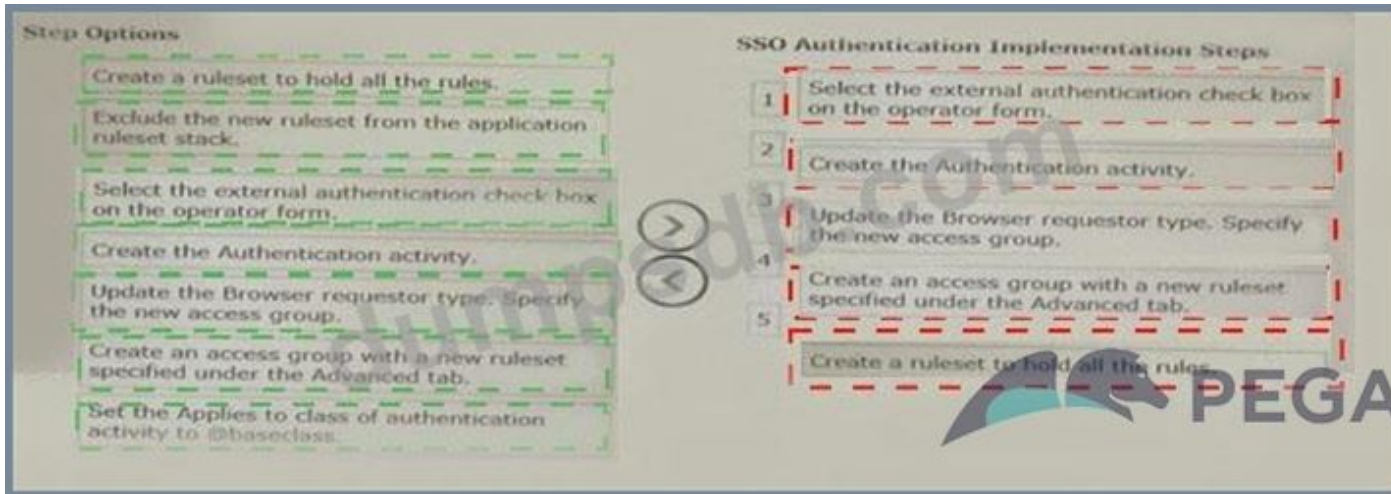

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 25

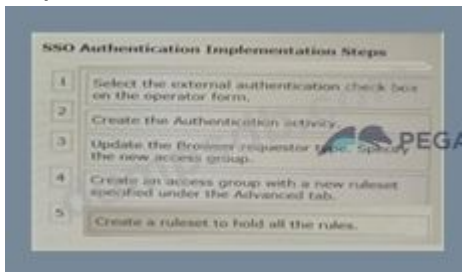

Select and move the five steps required to implement single sign-on (SSO) authentication in a pega application to the SSO authentication implementation steps column. (choose five)

Answer:

Explanation

Text Description automatically generated

NEW QUESTION: 26

You review and tune the agent configuration on a production system since some default agents----- and-----.(choose two)

- A. need to be registered with the master agent
- B. Should never run in a production environment.
- C. Are not necessary for every application.
- D. require an agent schedule record

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 27

XYZ Corporation would like a report that shows the number of employees who have been with the company more than 20 years, between 15 and 20 years, between 10 and 15 years, between 5 and 10 years, and less than 5 years.

How do you implement this report using Pega?

- A. Use a correlated subreport.
- B. Use a listView with a custom getContent Activity.
- C. Use a Connect-SQL rule.
- D. Use a SQL Function.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 28

You imported a rule-admin-product (RAP) file that contains new features into a user acceptance testing(UAT) environment. Select the option that ensures basic functionality behaves as expected before inviting users to start acceptance testing.

- A. Create a regression test suite. Run the test suite using the automation server.
- B. Create an integration test suite. Run the test suite using the Execute Test REST service
- C. Create a smoke test suite. Run the test suite using the pre-import process.
- D. Create an ad hoc test suite. Run the test suite using the post-import process.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 29

Identify the two correct statements regarding Localization wizard capabilities. (Choose Two)

- A. Extracts the string values from all application field values, paragraphs, and correspondence records.
- B. Generates a package for French even though Pega provides an associated language pack.
- C. Automatically sets the locale, base currency, and time zones based on the user's language.
- D. Creates field value rules for all labels used in the application.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 30

You oversee a medium-size development team. Some of the team members are new to Pega and are working on features in a separate branch.

What are two ways you can ensure that the rules the team creates adhere to best practices? (Choose Two)

- A. Use Pega Log Analyzer to locate any exceptions in the branch associated with the new team members.
- B. Leverage the branch review feature to have senior team members validate the branch contents.
- C. Run 1 rarer on each new rule in the branch that new team members check in to identify any failures in rule execution.
- D. Review the branch quality to identify any rules with guardrail warnings.

Answer: B,D ([LEAVE A REPLY](#))
