

SAP.C-IBP-2111.v2022-01-28.q33

Exam Code:	C-IBP-2111
Exam Name:	SAP Certified Application Associate - SAP Integrated Business Planning
Certification Provider:	SAP
Free Question Number:	33
Version:	v2022-01-28
# of views:	1258
# of Questions views:	330
https://www.dumpsdb.com/dumps/SAP/C-IBP-2111/SAP.C-IBP-2111.v2022-01-28.q33	

NEW QUESTION: 1

Why would you set up a cascading filter in the planning view? Note: There are 2 correct Answers to this question.

- A. To filter using attributes that have a large number of values
- B. To filter data in an Application Job template
- C. To filter attributes based on specific values
- D. To filter attributes based on other attribute filters

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 2

Which of the following is one of the functions of multi-echelon inventory optimization?

- A. Ability to optimize lead times between different locations
- B. Ability to maintain high external service levels with low internal service levels
- C. Ability to maintain high external service levels with high internal service levels
- D. Ability to optimize delivery costs between different locations

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 3

Which of the following are functions of SAP IBP for demand? Note: There are 3 correct Answers to this question.

- A. Detailed statistical analysis of demand data using predictive analytics tools

- B. Demand sensing of demand data using the supply chain algorithm library
- C. Demand sensing of demand data using predictive analytics tools
- D. Embedded, on-the-fly demand analytics
- E. Detailed statistical analysis of demand data using the supply chain algorithm library

Answer: (SHOW ANSWER)

NEW QUESTION: 4

Which of the following are features of the S&OP process templates? Note: There are 2 correct Answers to this question.

- A. All process templates are assigned to dashboards.
- B. Each step depicted in the template can have tasks associated with it.
- C. The number of steps in a process template is the same for all implementations.
- D. New instances of templates allow for re-use of the same processes again.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 5

Model configuration allows the attributes of a master data type to be assigned as key figures. Which features are relevant for this type of object?

- A. This type of key figure is not usually stored and it cannot be set to editable.
- B. This object contains user-defined criteria that monitor execution of business plans.
- C. This object provides a single value for a unique planning combination.
- D. This object is not exposed to the user in planning views or modeling.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 6

The Analytics Advanced app allows you to work with different types of charts. What can be the origin of the charts you can work with?

- A. Dashboards Advanced
- B. Custom Alerts
- C. Process Templates
- D. SAP IBP VBA Add-in template

Answer: D (LEAVE A REPLY)

NEW QUESTION: 7

You are evaluating criteria for choosing the solver to support planning for a complex supply chain. What are some of the points that should be reviewed? Note: There are 2 correct Answers to this question.

- A. Push and Pull production models are used by the optimizer.
- B. Planning results can be generated faster by the optimizer.
- C. Prioritization of demand elements one by one is achieved by heuristics.
- D. Finite heuristics can achieve demand prioritization and pegging.

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 8

You are invited to review a problem with a customer's SAP IBP Excel template performance. What areas with the biggest potential performance impact would you focus on? Note: There are 2 correct Answers to this question.

- A.** Number of local members and complexity of calculations
- B.** Number of analytics charts displaying key figures' values
- C.** Excessive IBP formatting in Excel UI
- D.** Complex calculation graphs for key figures

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 9

You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer? Note:

There are 2 correct Answers to this question.

- A.** Loc-Prod Subst Valid-From Date
- B.** Location Product Sub Cost Rate
- C.** Flag 'Disable Substitution of Location Products'
- D.** Promotion duration

Answer: A,D ([LEAVE A REPLY](#))

NEW QUESTION: 10

You are creating advanced copy operators as part of an SAP IBP solution that is being implemented.

What do you need to be aware of when defining data transfer? Note: There are 2 correct Answers to this question.

- A.** Specifying target key figure that is time independent is possible.
- B.** Specifying source key figure is mandatory.
- C.** Selecting by attribute with option 'contain' is possible.
- D.** Specifying target key figure is mandatory.

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 11

You created a key figure and want to add calculations. Which of the following rules do you consider?

Note: There are 2 correct Answers to this question.

- A.** All key figure calculations have calculation inputs, which can be marked as stored or calculated.
- B.** Key figures can be calculated across different planning levels.

C. Aggregation calculations using SUM or MAX functions must be based on a higher aggregation level.

D. The calculation chain for a key figure must always result in a calculated key figure.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 12

How can you make charts and dashboards private?

A. Enable the relevant settings in the Analytics Advanced and Dashboards Advanced applications.

B. Set restrictions for charts in the Permission filter application.

C. Enable the relevant settings in the global configuration parameters.

D. Choose only relevant key figures and filters in the Analytics Advanced application.

Answer: C (LEAVE A REPLY)

NEW QUESTION: 13

You are redesigning planning for supply chain that is facing the issue of variability. What is the best solution for dampening variability via demand classification?

A. SAP IBP for Sales and Operations Planning

B. SAP IBP for Demand Driven Replenishment

C. SAP IBP for Demand

D. SAP IBP for Inventory

Answer: B (LEAVE A REPLY)

NEW QUESTION: 14

You want to display and edit data in different units of measure (UOM). Which of the following must you consider before you use UOM? Note: There are 3 correct Answers to this question.

A. Unit of measure is an attribute of a master data type, such as Product.

B. Conversion to the target unit of measure is handled by functionality of SAP IBP Excel UI

C. Units of measure are usually not time-independent.

D. Units of measure are usually not time-dependent.

E. Analytics provide the user with the option to select the target unit of measure.

Answer: A,D,E (LEAVE A REPLY)

NEW QUESTION: 15

While modeling costs for optimization, you are conscious of the necessity to respect inventory targets and meet demands in the short term. Which of the following are valid relationships between costs you must adhere to? Note: There are 2 correct Answers to this question.

A. Target inventory violation cost should be less than transportation cost rate.

B. Target inventory violation cost should be greater than discount for demand lateness.

- C. Target inventory violation cost should be greater than inventory holding cost rate.
- D. Target inventory violation cost should be less than max inventory violation cost.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

Where can we see the results of Time Series analysis in SAP IBP?

- A. Time Series Property Attribute in Customer Source
- B. Time Series Property Attribute in Customer Product
- C. Time Series Property Attribute in Customer
- D. Time Series Property Attribute in Product

Answer: D ([LEAVE A REPLY](#))

Valid C-IBP-2111 Dumps shared by TrainingQuiz.com for Helping Passing C-IBP-2111 Exam! TrainingQuiz.com now offer the **newest C-IBP-2111 exam dumps**, the TrainingQuiz.com C-IBP-2111 exam **questions have been updated** and **answers have been corrected** get the **newest** TrainingQuiz.com C-IBP-2111 dumps with Test Engine here: <https://www.trainingquiz.com/C-IBP-2111-practice-quiz.html> (82 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 17

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results? Note: There are 2 correct Answers to this question.

- A. It should be a non-key attribute of the master data type.
- B. It belongs to a simple or compound master data type.
- C. The length of the attribute needs to be 18 digits.
- D. Its data type is INTEGER and its length has been specified.

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 18

Which of the following are features of the S&OP process templates? Note: There are 2 correct Answers to this question.

- A. Each step depicted in the template can have tasks associated with it.
- B. The number of steps in a process template is the same for all implementations.
- C. New instances of templates allow for re-use of the same processes again.
- D. All process templates are assigned to dashboards.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 19

A time profile is defined with the levels of day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other buckets?

- A. IF("PERIODID5" = "\$\$PERIODID5CU\$\$...)
- B. IF("PERIODID4" = "\$\$PERIODID4CU\$\$...)
- C. IF("PERIODID3" = "\$\$PERIODID3CU\$\$...)
- D. IF("PERIODID2" = "\$\$PERIODID2CU\$\$...)

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

Which of the following can be used as inputs for inventory level optimization? Note: There are 2 correct Answers to this question.

- A. Reorder point
- B. Lot sizes
- C. Target inventory level
- D. Lead time variability

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Which of the following stages can be modeled using scenarios from the S&OP planning cycle? Note:

There are 2 correct Answers to this question.

- A. Data input review for inventory
- B. Demand review
- C. Demand sensing stage
- D. Demand-supply balancing

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 22

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results?

Note: There are 2 correct Answers to this question.

- A. It should be a non-key attribute of the master data type.
- B. Its data type is INTEGER and its length has been specified.
- C. It belongs to a simple or compound master data type.
- D. The length of the attribute needs to be 18 digits.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 23

You are working with the inventory optimization process and you want to use a what-if analysis. What parameters are assessed by this analysis? Note: There are 2 correct Answers to this question.

- A. Service levels
- B. Changed variability
- C. Capacity consumption
- D. Number of planning combinations

Answer: A,B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Which conditions are prerequisites for key figure disaggregation?

- A. The key figure is calculated and editable.
- B. The key figure is calculated and aggregation mode is selected.
- C. The key figure is set to Not Editable.
- D. The key figure is stored and editable.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 25

You are adding a value-based filter to a planning view. Which of the following conditions apply? Note:

There are 3 correct Answers to this question.

- A. You can add (or delete) planning objects to a planning view after these filters are applied.
- B. These filters can be used together with attribute totals in the same planning view.
- C. You can only apply one value-based filter per planning view.
- D. The alerts dashboard is not available if a value-based filter is set for the open planning view.
- E. These filters are always applied based on the values stored in the database.

Answer: C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 26

Which of these conditions must be met to create a Local Member key figure?

- A. Activate Local Member Recognition is selected.
- B. A key figure is selected in the Key Figures tab in the Microsoft Excel add-in.
- C. A key figure is created in the Planning Area app.
- D. Use Excel Cell References in Report Editor is selected.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 27

Which of the following are features of lag-based snapshots? Note: There are 2 correct Answers to this question.

- A. Target key figures for these snapshots must have lag as a root attribute.
- B. Target key figures for these snapshots are exposed to the user in planning views.
- C. Lag-based snapshots are automatically assigned to a snapshot operator.
- D. Lag-based snapshots are created in the Configuration app for a fixed time range.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 28

Which library is used by the forecasting engine for the demand sensing algorithm?

- A. Heuristics library
- B. Predictive analytics library
- C. Supply chain algorithm library
- D. Demand library

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 29

When can filter blocks appear in calculations? Note: There are 2 correct Answers to this question.

- A. When modeling attribute as a key figure
- B. When modeling cross-period calculations
- C. When using IFISNULL statements in the formula
- D. When modeling attribute transformations

Answer: B,D ([LEAVE A REPLY](#))

NEW QUESTION: 30

You want to set up demand sensing to analyze demand changes in execution or close to execution windows.

Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

- A. The result generates sensed demand data at the monthly time granularity for the full time horizon
- B. Set up the forecast model to be executed at product-location level.
- C. At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.
- D. It is mandatory to load historical lag-based snapshot data.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 31

Which of the following data can be tracked using a change-history-enabled key figure?

Note: There are 3 correct Answers to this question.

- A. Reason code
- B. Attributes

- C. Key figure type
- D. Scenario ID
- E. Modified date

Answer: A,B,E (LEAVE A REPLY)

NEW QUESTION: 32

Which one of the following values can you use in disaggregation expressions?

- A. If (Attribute)=0
- B. KF1 (Stored) + KF2 (Stored) + Attribute
- C. KF1 (Stored) + Helper KF
- D. KF1 (Calculated) + Attribute

Answer: A (LEAVE A REPLY)

NEW QUESTION: 33

You have set up a planning area and data is available. You adjust the necessary time profile settings and run the consistency check. Which settings can you change and still run a successful consistency check?

Note: There are 2 correct Answers to this question.

- A. Change the past and future horizon of the levels in the time profile.
- B. Remove an attribute assigned to the time profile level if the attribute is used in a planning level.
- C. Add a new time profile level to the time profile.
- D. Change the description of the attributes in the time profile.

Answer: (SHOW ANSWER)
