NEW QUESTION: 1

The client provided these business requirements:

- * The B2C Commerce storefront will integrate with the client's Order Management System (OMS).
- * The storefront will provide real-time order export of successfully pieced orders. The OMS supports both web service export and SFTP batch order export, but the client has expressed concern about the availability of the OMS.

Which two solutions satisfy the requirements and address the OMS reliability concern?

Choose 2 answers

- A.** Implement a batch export of orders to SFTP, excluding exported orders. This runs as a scheduled job with a high-frequency run rate and marks processed orders as exported upon success.
- B.** Implement a live export of orders during checkout via web service, marking the processed order as exported when the AM returns successfully.
- C.** Implement a batch export of orders via web service, excluding exported orders. This runs as a scheduled job with an hourly run rate and marks processed orders as exported upon success.
- D.** Implement a live export of orders during checkout via SFTP, marking the processed order as exported when it has completed successfully.

Answer: A,B (LEAVE A REPLY)

NEW QUESTION: 2

A client has just pushed a new site live to Production. However during smoke testing, it's found that some customers are not seeing the correct pricing on the Product Detail Page.

What three places would the Architect begin to look for the cause of this issue?

Choose 3 answers

- A. Check the Global Preferences to be sure the settings are correct.
- B. Check that there was not an error during replication.
- C. Check Log Center
- D. Check the Quota Status page.
- E. Check that the cache is set correctly

Answer: B,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 3

The Architect has been presented with a requirement from the business to implement a new LINK cartridge. The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers. On review, the Architect notes that the Jobs are all created in Pipelines.

How should the Architect implement that cartridge to make sure the required jobs runs property?

- A. The job Pipelines must be removed and recreated with scripts.
- B. The job Pipelines must be updated to work as custom job steps.
- C. The Job Pipelines must be updated to use SiteGenesis Controllers.
- D. The job Pipelines must be updated to use SFRA Controllers.

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 4

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

A)

```
{
  "nto.net": "www.ntonet.net",
  "nto.eu": "www.nton.eu",
  "nto.event.eu": "www.nton.eu"
}
```

B)

```
{
  "www.nton.eu": "www.nton.eu"
}
```

```
{
  "nto.eu": "www.nton.eu",
  "nto.at": "www.nton.at",
  "nto.de": "www.nton.de"
}
```

D)

- A. Option A
- B. Option B
- C. Option D
- D. Option C

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 5

a client uses an external marketing tool to manage promotions and coupons for its multiple brands. They currently have only one brand on B2C Commerce and they get Import-ready feeds created by this tool on an SFTP location.

The marketing team completes the data preparation by the end of the work day.

How should the Architect handle this import?

- A. Create a Job and define three steps: one step uses ExecuteScriptModule to download the files from SFTP, and two standard steps to Import the promotion and coupons.
- B. Create a Job and define three custom steps: download the files from SFTP, import promotions, import coupons
- C. Create a job and define three steps: one custom step to download the files from SFTP, and two standard steps to import the promotion and coupons.
- D. Create a Job and define three steps: one standard step to download files from sftp and two steps that use Execute Script Module to import the promotion and coupons.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 6

A company wants to add Salesforce Order Management to their existing B2C Commerce, Service Cloud, and Sales Cloud integration. Their current sales process lets sales reps build quotes, create orders, and process return orders for refunds as part of their sales channel workflow. Their B2C Commerce order objects also include multiple custom attributes that the merchant's current Order Management System uses to allocate orders to the correct distribution center for fulfillment.

When enabling Salesforce Order Management, what potential concerns will the merchant need to work through?

- A. Salesforce Order Management does not allow for fulfillment rules across multiple distribution centers without the use of an AppExchange package or custom Apex triggers.
- B. Custom attributes on B2C Commerce Orders are not natively supported for Salesforce Order Management integrations and require custom Apex development to handle mapping.

C. Salesforce Order Management integrates natively with B2B Commerce when both products reside within the same Org but requires the use of a customizable B2C Commerce cartridge to import data from a B2C Commerce instance.

D. Reduction Orders and Order Management change orders conflict if both are enabled in the same Org and require the use of Record Types and Apex Triggers or Validation Rules to avoid conflicts.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 7

The Client wishes to implement a third party integration that allows for free shipping If the customer Is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site1?

A. The customer order quota and related retention or deletion needs.

B. The OMS having order data sent to a thud party and related security needs.

C. The custom object quota and related retention or deletion needs.

D. The customer's order data sent to a third-party and related security needs.

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 8

Northern Trail Outfitters (NTO) wants to use Marketing Cloud to implement an Abandoned Cart Solution Workflow so that personalized messages are sent to shoppers who add items to their cart but abandon the B2C Commerce storefront.

Which two options should a Solution Architect recommended to meet this requirement? Choose 2 answers

A. Configure streaming updates for catalog importing, implement the Collect Tracking Code, and leverage Journey Builder to trigger an abandoned cart message.

B. Configure B2C Commerce catalog, product, order, and customer data feeds; implement Marketing Cloud collect.js and trigger an abandoned cart message through Journey Builder.

C. Configure streaming updates for catalog importing, implement Google Analytics tracking, and leverage Journey Builder to trigger an abandoned cart message.

D. Configure B2C Commerce catalog, product, inventory, and customer data feeds; implement Marketing Cloud collect.js and trigger an abandoned cart message through

Answer: ([SHOW ANSWER](#)**)**

Journey Builder.

NEW QUESTION: 9

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in

Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.

What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort'

- A.** The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- B.** The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.
- C.** The Architect should update all the deprecated API cats in the already integrated LINK cartridge and test thoroughly.
- D.** The Architect should check to see If the LINK cartridge has been updated already, integrate It, apply the customisations, and teat thoroughly.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 10

Northern Trail Outfitters (NTO) hosts a customer care portal using Service Cloud. The portal uses Marketing Cloud for customer interaction for a number of use cases, including customer sign-up and updates on toggged cases. NTO has decided that the connectors provided by Salesforce are not flexible enough for their needs, so they would like to explore a programmatic approach for doing so.

Which two considerations should a Solution Architect point out to NTO as it moves forward to integrate the Service Cloud portal with Marketing Cloud for customer interaction? Choose 2 answers

- A.** The Marketing REST API uses XML request and response bodies and resource endpoints to support multi-channel use.
- B.** The Marketing REST API calls are asynchronous, with timeout values of 120 for non-tracking operations and 300 seconds for tracking and data retrieve operations.
- C.** NTO can use Marketing Cloud REST API for integrating with Service Cloud.
- D.** NTO can use Marketing Cloud SOAP API for integrating with Service Cloud.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 11

A retail company currently uses 62C Commerce and Marketing Cloud to enable a seamless customer experience. They are evaluating tools to better support customer service activities like their call center for online ordering and social customer service.

Which two functionalities should a Solution Architect discuss with the company to explain the value of Service Cloud? Choose 2 answers

- A.** Ability to create a B2C storefront using Digital Experiences.
- B.** Ability to have a customer leave a journey when they have an escalated case.
- C.** Ability to de-duplicate and create a single customer identity.

D. Ability to allow the agent to see purchase history to support case management

Answer: C,D ([LEAVE A REPLY](#))

NEW QUESTION: 12

Northern Trail Outfitters (NTO) is at the beginning of an implementation of B2C Commerce and is now discussing the communication flow. They are designing the flows between systems to send password resets via email when a new account is created in B2C Commerce or the email address is updated.

Considering NTO also uses Service Cloud and Marketing Cloud, which feature should a Solution Architect suggest to optimize the end-customer experience while also ensuring that tracking is visible to service agents?

- A. Marketing Cloud Triggered Send
- B. Service Cloud Email Service
- C. Marketing Cloud Journey Event
- D. Commerce Cloud Email Service

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 13

A company that is a shoe-producer is doing Salesforce B2C Commerce implementation. In their Enterprise Resource Warning (ERP) system, the products are marked as being one of three types: boots, sandals, and sneakers. The business requirements based on the type are:

- * The messaging on Product Detail page is different
- * Customers are able to filter their Product Search Results

The customer's operations team asks about the format in which to send this value in the catalog. Which data type should the Architect specify for this attribute in the Data Mapping document?

- A. A custom attribute type set-of-string containing multiple values.
- B. A custom attribute of type string containing comma separated values.
- C. A custom attribute of type enum-of-string (single selectable value)
- D. A custom attribute of type enum-of-string (multiselect able value).

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 14

A new dent is moving from their existing ecommerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. it if required that the service implementation on the B2C Commerce site supports authentication and encoding.

What type should the Architect document this new service as?

- A. HTTP
- B. Generic
- C. SOAP

D. HTTP Form

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 15

An integration cartridge implements communication between the B2C Commerce Storefront and a third-party service provider. The cartridge contains the localServiceRegistry code:

```
var LocalServiceRegistry = require('dw/svc/LocalServiceRegistry');
module.exports = LocalServiceRegistry.createService('serviceprovider.rest.auth',
{
    createRequest: function(svc) {
        var svcCredential = svc.getConfiguration().credential;
        if (empty(svcCredential.user) || empty(svcCredential.password))
            throw new Error('Basic Auth requires valid client ID (user) and secret (password)');
    }
    var requestBody = {
        clientId: svcCredential.user,
        clientSecret: svcCredential.password
    };
    svc.setAuthentication('NONE');
    svc.addHeader('Accept', 'application/json');

    return JSON.stringify(requestBody);
},
    parseResponse: function(svc, httpClient) {
        return httpClient.text;
    }
});
```

How does this code sample accomplish authentication to the service provider?

- A. By disabling Basic Auth and executing the service authentication call.
- B. By wrapping the authentication service call with Basic Auth.
- C. By Issuing a Basic Auth request to the service provider.
- D. By performing a signed SOAP Auth request using a certificate.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 16

During the testing of the login form, QA finds out that the first time the user can log in, but every other login attempt from another computer leads to the homepage and the basket being emptied. Developers tried to debug the issue, but when they add a breakpoint to the login action, it is not hit by the debugger.

What should the Architect recommend developers to check?

- A. Add remote include for the login page
- B. Add disable cache page in the template ISML - <iscache status--off"/>.
- C. Check Login Form and any included templates for includes that enable page caching.
- D. Remove CSRF protection from Login Form Action.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

A company actively uses CI/CO processes for their Service Cloud implementation and is adding Marketing Cloud and Marketing Cloud Connect to their architecture. Under the current setup each developer has their own developer sandbox for development. Developers merge their changes into a sandbox for QA regularly, then once every week changes are moved to staging, and from staging to production instances.

Which set up should a Solution Architect propose to support this development approach considering costs and data segregation?

- A.** Set up one Marketing Cloud instance with a business unit for production and one business unit for testing that is connected to all Developer sandboxes
- B.** Set up one Marketing Cloud instance for testing and one for production, where the testing instance is connected to the staging sandbox
- C.** Set up one Marketing Cloud instance for production and create a Marketing Cloud sandbox to connect to each of the Service Cloud sandboxes
- D.** Set up one Marketing Cloud instance for each sandbox in Service Cloud

Answer: D (LEAVE A REPLY)

NEW QUESTION: 18

The Client wants to have a flash sale on a few products every day. These products are sold through B2C Commerce as well as an in store Point of Sale system that is tied to the same inventory.

An Architect analyzes the following proposed solution:

Inventory feed will continue to run daily but add a web-service call to compare and update B2C Commerce inventory in real time during checkout after a flash product's inventory reaches a threshold.

Which two risks should the Architect communicate to the Client about this solution?

Choose 2 answers

- A.** If the external hosted web-service is unreliable. It could be a point of failure in the site's order placement flow.
- B.** Because the job would still be configured to run daily there will be a degrade in performance during non-flash sales periods

C. If the product Inventory threshold that triggers the web service calls is reached too often. It will have a negative Impact on site performance.

D. The default rate limiter configuration for the web-service could cause the web-service to return an exception during high traffic.

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 19

A company plans to build a new B2C Commerce storefront for a popular segment of products that generate high-volume sales. Their team is evaluating whether B2C Commerce is the right platform to build this storefront, and they are specifically concerned about how quotas and limits directly impact the efficiency and stability of solutions built on the platform.

Which two considerations should a Solution Architect keep in mind when considering B2C Commerce Governance and Quotas?

Choose 2 answers

A. Object quotas status is updated with an up to 20-minute delay. Therefore, a Solution Architect must consider this delay when performing calculations related to traffic and limits.

B. If an enforced quota is exceeded, an exception is thrown, which prevents the current operation from completing. The Solution Architect should design the solution so that the exception can be caught within a customization.

C. Unless a site is experiencing performance issues, the Solution Architect can assume that quota violations have not occurred.

D. For sandbox instances, quotas can be softened by exporting them from a production instance and importing them onto a sandbox instance. This approach lets Solution Architects match the development environment to the production environment.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 20

A merchant has reported that customers are seeing low stock items at the top of their search results, giving them a subpar customer experience and impacting conversion.

How might this issue be resolved to ensure a better customer journey?

A. Create a job that sets all unavailable products to be hidden. Schedule the job to run hourly to clean up the catalog on a regular basis.

B. In Business Manager, enter a higher boost factor for availability in Searchable Attributes.

C. In Business Manager, set an availability low ranking threshold in Search Preferences.

D. In Business Manager, select Show Orderable Products Only at the root level to hide any products that are currently out of stock.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

A developer is remotely fetching the reviews for a product.

Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- A. Cached remote include with cache of the HTTP service
- B. Use custom cache
- C. Cache the HTTP service request
- D. Remote include with caching only the reviews

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 22

A B2C Commerce Developer has just finished implementing a new promotion code form on checkout. During review, an Architect notes that the form is not using CSRF validation correctly.

```
<form action="{URLUtils.continueURL()}" method="GET">
  <!-- ... the form input elements ... -->
  <input type="hidden"
    name="{dw.web.CSRFProtection.getTokenName()}"
    value="{dw.web.CSRFProtection.generateToken()}" />
  <input type="submit" value="Apply Promotion Code" />
</form>

handleAction({
  'addPromoCode': function (formgroup) {
    var CSRFProtection = require('dw/web/CSRFProtection');

    var status;
    var result = {
      cart: cart,
      EnableCheckout: true,
      ShowRedirect: true
    };

    status = cart.addCoupon(formgroup.couponCode.htmlValue);
    /* ... some error handling code, based on the returned status ... */
    return result;
  }
});
```

Which two options are best practice recommendations for dealing with CSRF validation? Choose 2 answers

- A. Automatically renew the CSRF Token if expired.
- B. Only use POST methods over HTTPS.
- C. Ensure the CSRF protection is validated on form submission.
- D. Only use GET methods over HTTPS.

Answer: (SHOW ANSWER)

NEW QUESTION: 23

A merchant has complained to the developers that some products are not appearing in the storefront and has asked them to diagnose and solve the issue.

Which two factors might be causing a product to be hidden?

Choose 2 answers

- A. Product Available to sell is <1.

- B. Product lacks a price.
- C. Product is not online.
- D. Product does not have any images.
- E. Product has been set to searchable.

Answer: B,D (LEAVE A REPLY)

NEW QUESTION: 24

Due to an integration issue, logs files are full. Because of that no new logs have been logged. Given this Business Manager logging configuration how would you solve the issue your client is experimenting in their site?

- A. Change root log level to error.
- B. Remove integration log level.
- C. Remove all log levels and activate them again when the issue is solved.
- D. Change integration log level to error.
- E. Disable integration log level by putting log level to OFF.

Answer: (SHOW ANSWER)

NEW QUESTION: 25

A multi-brand company uses B2C Commerce, Service Cloud, and Marketing Cloud and is seeking an order management solution. They process 2,000 orders per hour across their brands. The company has one B2C Commerce realm, two Salesforce core orgs, and two Marketing Cloud business units. The company is choosing between these three options for an order management tool:

- * Build an order management solution in B2C Commerce using order management APIs
 - * Purchase Salesforce Order Management
 - * Build a custom order management solution using their own development team
- Which three statements should a Solution Architect use to support using the Salesforce Order Management solution?

Choose 3 answers

- A.** Salesforce Order Management is a productized connector solution between B2C Commerce and Service Cloud; orders will be synchronized from the client B2C Commerce realm to multiple Salesforce Orgs without the need for customization.
- B.** The existing Service Cloud implementation team could extend the Salesforce Order Management product to the existing org.
- C.** B2C Commerce order management does not support complex or advanced use cases.
- D.** Salesforce Order Management synchronizes orders to and from B2C Commerce, which essentially replaces the Service Cloud Connector.
- E.** Salesforce Order Management shares the same database with Service Cloud while other solutions need to build additional integration.

Answer: A,B,C (LEAVE A REPLY)

NEW QUESTION: 26

During a technical review, the Client raises a need to display product pricing on the Product Detail Page (PDP) with discounted values per promotion. The Client notes customers complained of bad user experiences in the past when they would add a product to the basket from the cached PDP and then see a higher price when they started checkout as the promotion had expired. What should the Architect suggest be implemented for this given that performance should be minimally impact?

- A.** Remove caching of the product page during the promotion.
- B.** Modify the page to vary the cache by price and promotion.
- C.** Create a separate template or view based on the promotion.
- D.** Adjust the PDP to have a low caching period during the promotion.

Answer: B (LEAVE A REPLY)

NEW QUESTION: 27

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a -1month campaign:

- * Free correct- in -store shipping
- * 20% accessories products discount, applies for all customers
- * \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client is considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solution should the Architect suggest to keep the Call Center calls to a minimum?

- A.** Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- B.** Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.

- C. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets
- D. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 28

To properly configure your service connection to Salesforce Marketing Cloud you receive this configuration:

Timeout	3000 ms
Max calls	5 / second

After making a call to this service you receive a ServiceUnavailableException. What could be the reason?

- A. Force PRD Behavior in Non-PRD Environments option in the service configuration is checked.
- B. Commerce Cloud IP not whitelisted on Marketing Cloud.
- C. Circuit Breaker is enabled on the service profile and max circuit breaker calls are reached in the allowed time interval.
- D. Service mode is Mocked.
- E. Rate Limit is reached.

Answer: C,E ([LEAVE A REPLY](#))

NEW QUESTION: 29

The development team is building a complex LINK cartridge for a hosted checkout solution. The provider's database is used as a single source of truth, but the information in the Basket on B2C Commerce side needs to be synchronized. This is implemented asynchronously the back end when the customers interact with the hosted checkout page and change their shipping/bidding details.

As an Architect you have to advise the development team with how to implement the logging to ensure that there will be a mechanism available to allow troubleshooting in the case something goes wrong on production.

Which solution should the Architect suggest?

- A. Get logger for cartridge-specific category. Report Info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.
- B. Get logger for cartridge specific category. Report debug level message for the back end asynchronous communication between both systems. Report all errors at error level message.
- C. Report debug level message for the back-end asynchronous communication between both systems. Report all errors at error-level message.
- D. Report info level message for the back-end asynchronous communication between both systems Report all errors at error level message.

Answer: (SHOW ANSWER)

NEW QUESTION: 30

A company is in the process of defining the authoritative system for key data entities involved in B2C journeys. The company has about 200,000 customers, each averaging 30 orders per year. Which two systems are considered an authoritative system for consent and compliance preferences, as well as primary person attributes such as name, address, birthday, phone, and email?

Choose 2 answers

- A. Service Cloud
- B. B2C Commerce
- C. Marketing Cloud
- D. Experience Cloud

Answer: A,C (LEAVE A REPLY)

NEW QUESTION: 31

New client is going to migrate to the Salesforce Commerce Cloud. Website is ready to be live but just is missing the customers and previous orders. What should we do?

- A. There are no blockers. If everything else is working, the site can go live.
- B. Change Site status from password protected to live and import missing data when ready.
- C. Send a ticket to Salesforce to publish the new site and import later missing data.
- D. Import at least orders before going live.

Answer: D (LEAVE A REPLY)

Valid ARC-300 Dumps shared by TrainingQuiz.com for Helping Passing ARC-300 Exam! TrainingQuiz.com now offer the **newest ARC-300 exam dumps**, the TrainingQuiz.com ARC-300 exam **questions have been updated** and **answers have been corrected** get the **newest** TrainingQuiz.com ARC-300 dumps with Test Engine here: <https://www.trainingquiz.com/ARC-300-practice-quiz.html> (67 Q&As Dumps, **40%OFF Special Discount: Exam-Tests**)

NEW QUESTION: 32

The Home-Show route uses this middleware chain:

```
server.get('Show', consentTracking.consent, cache.applyDefaultCache, function (req, res, next) {  
  // base code here  
});
```

The developer added Home.;s in another cartridge, which is before the original cartridge in the cartridge path, to extend that route but it does not have the middleware chain:

```
server.append('Show', function (req, res, next) {
  // custom code here
});
```

Assuming the code is correct on both functions, what is the expected result?

- A. A RunTime error is thrown, "Error: Params do not match route".
- B. The base code executes, but the custom code is ignored because the signature lines do not match.
- C. The custom code executes and then the base code executes.
- D. The base code executes and then the custom code executes.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 33

The Client has requested an Architect's help in documenting the architectural approach to a new home page. The requirements provided by the business are:

- * Multiple areas of static image content, some may need text shown at well
- * The content page must be Realizable
- * A carousel of featured products must be shown below a banner 101191
- * Recommended categories will be featured based on the time of year

Which two solutions would fulfil these requirements?

Choose 2 answers

- A. Leverage B2C Commerce locales in Business Manager
- B. Leverage B2C Commerce content slots and assets
- C. Leverage B2C Commerce Page Designer with a dynamic layout.
- D. Leverage B2C Commerce Content Management Service

Answer: B,C ([LEAVE A REPLY](#))

NEW QUESTION: 34

A developer wants to import the data or different instances.

Which two types of data should the developer consider importing?

Choose 2 answers

- A. Services
- B. Catalog
- C. Customers
- D. Sites configurations
- E. Metadata

Answer: D,E ([LEAVE A REPLY](#))

NEW QUESTION: 35

A Client has automated builds that deploy the code; however, recent builds started failing with compilation issues, which are not reproducible in developer's environment.

What first step needs to be taken to identify and fix the issue?

- A. Verify the modules versions used to generate the code.
- B. Clean up build server work space and run job again.
- C. Recreate the job in the build server to verify compilation issues.
- D. Verify the generated JavaScript and CSS for the build.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 36

Given the SFRA Controller below:

```
01 var server = require('server');
02 var cache = require('*/cartridge/scripts/middleware/cache-salesforce
03
04 server.get('Show', cache.applyDefaultCache, function (req, res, next) {
05     viewData = {name: 'my string'};
06     res.render('/pages/mypage', viewData);
07     next();
08 });
09
10 module.exports = server.exports();
```

Why would a JavaScript debugger, that is stopped at line 06, fail to show the viewdata variable in the inspection tool?

- A. viewdata is assigned but not declared.
- B. cache. applyDefaultCache is not a valid middleware.
- C. viewdata is a B2C Script reserved name.
- D. viewdata is declared but not assigned.

Answer: A (LEAVE A REPLY)

NEW QUESTION: 37

A merchant uploads an image using the Content Image Upload module of Business Manager.

Which three modules can the merchant or developer use to display the image on the Storefront?

Choose 3 answers

- A. Content assets
- B. Storefront catalogs
- C. ISML templates
- D. Content slots
- E. Payment types

Answer: A,B,D (LEAVE A REPLY)

NEW QUESTION: 38

An ecommerce site has dynamic shipping cost calculation. it allows the customers to see their potential shipping costs on the Product Detail Page before adding an item to the cart.

For this feature, shipping costs are calculated using the following logic:

- * Set the shipping method on the Basket
- * Add the item to the basket, calculate the basket total and get the shipping cost for this method

* Remove the item from the Basket to restore the original state

* The above process is repeated for each shipping method

During the testing it was discovered that the above code violates the spi.basket.addResolveInSameResquest quota.

What should the Architect do to resolve this issue and maintain the business requirement?

A. Omit the calculation of shipping cost until the customer is ready to check out and has chosen the shipping method they want to

B. Omit the removal of the Item and speed up the process for the customer by adding the product to the basket for them.

C. Wrap each Individual step of the process its own transaction Instead of using one transaction for all steps.

D. Wrap the adding of product and shipping cost calculation in a transaction which Is then rolled back to restore the original state

NEW QUESTION: 39

The Client is Crowing and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the f metrics for its existing website over the past 12 months and forecasted into the next year:

Average visits per hour	500
Peak visits per hour	3000
Average page views per hour	10000
Peak page views per hour	20000
Average orders per hour	100
Peak orders per hour	250
Average items per order	2.1
Average order value	300 USD
Expected growth percentage	300

Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

A. 1500 visits per hour, 30000 page views per hour, and 375 orders per hour

B. 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour

C. 3000 visits per hour, 60000 page views per hour, and 750 orders per hour

D. 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour

Answer: **A** ([LEAVE A REPLY](#))

NEW QUESTION: 40

A company has B2C Commerce and Marketing Cloud. The Marketing team wants to match up the purchasing data from B2C Commerce to the Marketing Cloud subscriber data.

Which two objects from B2C Commerce should a Solution Architect map to Marketing Cloud in order to meet the company's needs?

Choose 2 answers

- A. Contact
- B. Customer
- C. Orders
- D. Profile

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 41

Which standards allow dw.ws.WebReference2 class?

- A. SOAP 1.1 and SOAP 1.2
- B. RPC/Encoded WSDLs
- C. Apache CXF
- D. WSDL 1.1
- E. https 1.0 and 1.1

Answer: A,C,D,E ([LEAVE A REPLY](#))

NEW QUESTION: 42

A developer uses the call() instance method of dw.svc.Service to invoke a web service and implemented the callback methods defined by the dw.avc.ServiceCallback class.

Which callback method is required only when invoking a SOAP service?

- A. createRequeat
- B. initServiceClient
- C. mockCall
- D. parseResponse

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 43

Our client notifies you that the iOS application made a few months ago for some reason now is experiencing a degradation service and some requests take too long to respond. What tool will use it in order to check if there is any issue with OCAPI calls?

- A. Reports & Dashboard under Technical tab.
- B. Log center filtering by request type OCAPI
- C. Code Profiler
- D. Pipeline Profiler filtering results with Extended script development mode.

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 44

During implementation, the team found that there is a notification controller exposed for an external service that marks the order as paid when notification is received. The notification URL is sent to the service together with the payment request and contains only the URL with orderID as the parameter.

What should the Architect recommend to the team in order to prevent the unauthorized usage of the controller to mark the orders as paid?

- A. Add an order token in the callback URL and match the token against the one stored on the order.
- B. Add a session attribute and validate it on the callback.
- C. Add a customer number in the callback URL and match the customer number against the one stored on the order.
- D. Add HTTPS restriction to the controller start node.

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 45

An organization uses B2C Commerce to capture order details but needs to process the order in an ERP system. They want B2C Commerce to send a message to the ERP system with the order details after they have been entered, then wait for the order to be processed, and then receive a reply from the ERP system with the order number and status.

Which integration pattern should a Solution Architect use to meet this requirement?

- A. Publish / Subscribe
- B. Request and Reply
- C. Batch Data Synchronization
- D. Asynchronous Call-Out

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 46

A company wants to integrate B2C Commerce and Marketing Cloud so that customers shopping online can be segmented for marketing campaigns like Abandoned Cart and Post Purchase Journeys.

Which two actions are needed to enable an Abandoned Cart Journey?

Choose 2 answers

- A. Implement the Marketing Cloud collect.js through the storefront by using the Connector's reference implementation
- B. Integrate product, order, and customer data feeds into Marketing Cloud Data Extensions
- C. Use Mulesoft to bring order and customer data feeds from B2C Commerce to Marketing Cloud
- D. Integrate product, order, and customer data feeds into Service Cloud objects

Answer: A,C ([LEAVE A REPLY](#))

NEW QUESTION: 47

A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept batch survey data. The initial implementation of the integration includes

1. Marking the order as requiring a survey before order placement
 2. On the order confirmation page, the survey form is displayed for the customer to fill
 3. The data is sent to the survey provider API, and the order is marked as not requiring a survey
- Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:

1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
2. Some customers skipped the form. The Business requires sending a survey email to such customers.
3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removed from the xml.

How should the Architect address the issues and requirements described above?

- A.** Create a custom object when the survey is required. Send to the API endpoint in real-time. On success, remove the object. On failure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.
- B.** Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with API from the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- C.** Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use the session attribute to send emails for the cases when survey was skipped.
- D.** Send the survey data to the API endpoint in real-time until the survey data is successfully captured. Instruct the OMS development team to update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.
